

# 2300 Series Multi-Pole Reed Relays

## Multi-Pole Reed Relays

The Coto 2300 series is designed to offer the densest packaging available in a multipole reed relay. The size and footprint of the 2300 series complement the 2200 and 2900 series relays. The 1 Form C model is constructed with individual switch capsules for the normally open and magnetically biased normally closed contacts which are more reliable than the spring actuated 1 Form C reed switches. Custom pin-outs as well as custom designs are available to meet particular applications. Special designs include 1 Form B, 2 Form B, latching, and high voltage relays.

## 2300 Series Features

- ◆ Smallest Multipole Relay: 0.056 sq. inches/pole (3 pole relay)
- ◆ Up to 3 Form A or 2 Form C Contacts
- ◆ Hermetically Sealed Contacts
- ◆ Long Life / High Reliability
- ◆ Magnetically Shielding Steel Shell
- ◆ Optional Electrostatic Shield (on most models)

## Notes:

<sup>1</sup> Consult factory for life expectancy at other switching loads.

<sup>2</sup> Release time is specified with a zener diode suppression circuit consisting of a 20 V zener diode in series with a 1N4148, connected in parallel with the coil.

<sup>3</sup> Break-before-make action on Form C Model 2341 is not guaranteed. Consult factory if break-before-make is required.

<sup>4</sup> Electrostatic shield is connected to pin #6. Coaxial shield is connected to pins #6 and #7.

<sup>5</sup> This relay is polarity sensitive. Pin #3 MUST be positive.

## Environmental Ratings:

Storage Temp: -35°C to +100°C;

Operating Temp: -20°C to +85°C

Solder Temp: 270°C max; 10 sec. max

The operate and release voltage and the coil resistance are specified at 25°C. These values vary by approximately 0.4% / °C as the ambient temperature varies.

Vibration: 20 G's to 2000 Hz; Shock: 50 G's
