

Dissipative Markings for ESD Areas

Dissipative Marking Tape for ESD Areas

This ESD-Markingtape convinces with excellent ESD characteristics, high durability, cleanroom compatibility and strong abrasion resistance.

Due to its low resistance to ground, this adhesive tape can even be applied on work surfaces, on which ESD sensitive components are being handled.

It can be removed without leaving any residues on the floor, even after a long time of use.

- Unrolling charge: <100V
- Decay time: <0.1s
- Resistance to ground: $<1 \times 10^9 \Omega$ (12%rF, 23°C)
- Surface resistance: $<1 \times 10^9 \Omega$ (12%rF, 23°C)
- Material: PVC
- Core: 75mm inside diameter, plastic (applicable for cleanrooms)
- Dimensions: 50mm x 33m
