

# RA CONNECTOR

Disconnectable Crimp style connectors

Crimp style receptacles that are designed to mate with headers conforming to MIL-C-83503. The low insertion force contacts reduce surface finish wear and resist stress relaxation very well.

### Secure lock device

The locking levers are engaged by inserting the receptacle into the header. This ensures a firm connection that's highly resistant to impact and vibration.

### Housing lances

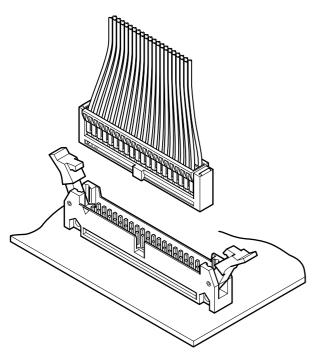

The contact retention lances on the resilient housing allow visual confirmation of contact lock-in for easy and secure insertion.

### • Low insertion force contact

The low insertion force contacts reduce surface finish wear and reduce the effects of stress relaxation.

### • Anti-misinsertion feature

The guide devices of both housing and header prevent reverse connector insertion.
