one company » a world of innovation

Whether you require one product or a total end-to-end solution, Molex is committed to assisting you in making the right choice for your business requirements.

Our team of technical experts will provide you with a true and honest assessment of your business requirements and design a customized system to support your business today, while providing the necessary performance to future-proof your requirements for tomorrow.

By choosing Molex you can be safe in the knowledge that whatever the project, our goal is to ensure that your transfer to a new system runs as smoothly as possible. We work closely with our installation partners to maintain the same high standards, regardless of the complexity or simplicity of the project.

This commitment to our customers is reflected in our 25 year System Performance and Application Assurance Warranty and the ongoing support we provide to our business partners.

Whether you require one product or a total end-to-end solution, we are poised to deliver what you need, when you need it.

MOLEX IS COMMITTED TO PRESERVING THE GLOBAL ENVIRONMENT

e c o c a r e

We understand that preservation of the global environment is an important issue for everyone, and that our business operations have an effect on the global environment. As a responsible corporate citizen, we are committed to using environmentally conscious practices during the design and manufacture of our products. These environmental practices are designed to ensure that Molex is developing sustainability through environmental preservation activities.

- » Establish and implement effective Environmental Management Systems.
- » Comply with, or exceed, all relevant environmental, legal and other requirements.
- » Operate our facilities while considering the efficient use of natural resources, and strive to develop products that make the lowest possible environmental impact throughout the product life cycle.
- » Continually improve our environmental performance and operations by establishing environmental targets and objectives:
- » Advise every person who works for, or on behalf of Molex, of the importance of adhering to this statement.
- » Reduce or eliminate emissions and discharges from our operations that would have a negative impact on the environment through activities that help prevent pollution.
- » Educate and train employees to work in an environmentally responsible manner.

Many of our worldwide manufacturing sites are certified to the ISO 14001 environmental management system standard, which requires that a broad range of environmental processes and policies be in place to minimize environmental impact and maintain compliance with environmental regulations.

Bringing Advanced Physical Layer Lifecycle Management to Enterprises WORLDWIDE

APLLM (Advanced Physical Layer Lifecycle Management) is Molex Premise Network's revolutionary suite of solutions providing enterprises with the ability to manage their Physical Layer infrastructure with a level of visibility and integration unique within the structured cabling industry. Using a combination of software, electronics and traditional data transport solutions, APLLM allows businesses to track and manage their infrastructure investment starting from planning through to design, procurement, installation, daily management of moves, adds and changes (MACS) and the eventual upgrade of that infrastructure including attached assets, thereby spanning its entire lifecycle.

The Technology Behind APLLM

APLLM is made up of a combination of software, electronics and traditional Data Transport solutions. As part of APLLM, Molex Premise Networks has introduced two exclusive products - INSIGHT and MIIM™ - which integrate seamlessly with Data Transport systems to add exciting new dimensions to network management.

MIIM™

MIIM is a comprehensive solution focusing on enhancing network management at the physical layer, network security, asset management, increased productivity and visibility. In addition to MAC & work order management, the solution detects network device connect/disconnects regardless of power or broken cables and Smart polling provides constant information on all network devices connected to work area outlets. Compelling MIIM differentiators include true centralized management of the channel beyond the wire closet out to remote work areas regardless of LAN topology, guided patching impervious to human error and collection/reporting/alarming of real time Layer 1 data, registering minimal impact on network resources.

INSIGHT

INSIGHT is an on-line deployment system for the planning and management of infrastructures and their connected assets. Consisting of 3 core modules; Project Control, Connectivity Management and MAC Management, INSIGHT increases visibility, control, automation and collaboration for the management of any infrastructure to specified stakeholder groups. Some core features include best practice libraries, customized work flows, multi-user permissions and partitioning, and real-time access to information from any global location, which combine to drive a powerful uniqueness.

Data Transport Solutions

A broad selection of standards-compliant, end-to-end structured cabling solutions including copper, fiber and free space optics that connect businesses to their mission critical applications.

Whatever your requirement, we have a solution that supports it.

Advanced Physical Layer Management

MIIM™

A

The MIIM™ solution provides the most comprehensive Advanced Physical Layer Management. Simple to implement and manage, the solution uses industry standard components and the incremental cost to the user is significantly reduced. Providing event-driven smart polling of attached devices, even

if the device is off, MIIM continuously monitors & maps the physical layer. It facilitates work order management, including scheduling and recording of moves, adds and changes (MACs), and enables patch guidance for technicians, with LEDs on the patch panels to indicate ports with pending work orders

MIIM Scanner

MIIM scanners monitor activity on a MIIM enabled system. Each 1U scanner can be connected to up to 48 patch panels providing monitoring of up to 576 separate physical channels. Standard RJ45 patch cords are used as the data bus connection between scanners and patch panels.

MIIM scanners can be configured and activated independently of the software. When the MIIM application software is connected to the scanner, it "discovers" active hardware and devices on the network and uploads this information onto the MIIM application software. Scanners monitor the connection state of MIIM channels and pass state change data to the MIIM application software. This triggers MIIM's smart polling function which queries the specific outlet and updates the software.

- Smart polling enables continuous updating of MIIM with minimal impact to the network
- Simple scanner configuration
- Auto discovery of active hardware/devices & automatic database population
- Mission critical port disconnection alerts
- Trace to device location
- Low power consumption with no specific fans or cooling required
- Automatic Rediscovery/Re-synchronization after outage or system failure
- Transaction queues record events for later delivery if the scanner is disconnected from the MIIM application
- Data bus connection between the scanner and patch panel is via an industry standard RJ45 patch cord

Order No.	SAP No.	Description
IMS-00100	183240000	MIIM 576 Channel Scanner

MIIM 24 Port Copper Patch Panel

MIIM Patch Panels are used within the MIIM System. Each 1U 24 Port Patch Panel has one data bus connection port located on the rear of the panel.

The data bus connection port connects the panel to the MIIM scanner via a standard RJ45 patch cord. The patch panel is able to detect connectivity at both the patch panel and work area outlet. Two built-in power status indicators on the panel ensure visibility of power from the scanner.

Panels work as conventional patch panels when not connected to the MIIM system. The Category 6 panel is unshielded, while the Category 6A panel is shielded.

- 24 port 1U
- EIA 568A/B wired
- Standard 19" rack mount
- Two power status indicators to ensure proper connection of power supply from the scanner
- Data bus connection to the MIIM Scanner is via an industry standard RJ45 patch cord
- Integral cable management shelf ensures bend radius compliance
- International hardware kit contains both ANSI and metric hardware
- Can be terminated using industry standard punch-down tools
- RoHS Compliant

Order No.	SAP No.	Description
PID-00221	183200000	MIIM Category 6, 1U, 24 Port Patch Panel 568A/B
PID-00231	183210000	MIIM Category 6A, 1U, 24 Port Patch Panel 568A/B

MIIM 24 Port Duplex LC Fiber Panel

MIIM Fiber Optic enclosures are used within the MIIM System. The adapter interface is 24 duplex LC adapters. Each 1U 24 Port enclosure has one data bus connection port located on the rear of the panel that connects the panel to a MIIM scanner via a standard RJ45 patch cord. Two built-in power status indicators on the panel ensure visibility of power from the scanner. When connected to a MIIM scanner, the panels detect connection activity on each duplex LC port. The patch panel works as a conventional patch panel when not connected to the MIIM system

- Two power status indicators to ensure proper connection of power supply from the scanner
- Uses standard RJ45 patch cords for data bus connection to the MIIM scanner
- Panel options for Singlemode and Multimode (OM1, OM2, OM3)
- Slide out cable management shelf
- Recessed mounting provides adequate space for routing patch cords, even in free standing enclosures with the front door closed
- ANSI and international metric hardware kit provided

Order No.	SAP No.	Description
RFR-00300	183230000	MIIM Singlemode 24P Duplex LC Fiber Patch Panel
RFR-00301	183230001	MIIM Multimode 24P Duplex LC Fiber Patch Panel

Advanced Physical Layer Management

MIIM™

MIIM Fiber Patch Cords

MIIM™ Fiber Optic patch cords are used to connect MIIM fiber panels within the MIIM System. MIIM patch cords incorporate a monitoring cable along with contact points on the patch cord connectors that activate the detection mechanism in the MIIM patch panel. When used with the rest of the MIIM system, the patch cords will provide connectivity information to the MIIM system.

- Monitoring contact interfaces with MIIM fiber patch panels
- MIIM patch cords are constructed from two fibers contained in an outer jacket
- Available in Singlemode (OS1) and Multimode (OM1, OM2, OM3) constructions

MIIM Outlet Terminator

The MIIM Outlet Terminator is used at the work area outlet to allow the MIIM system to monitor the connection of the horizontal cable to the work area outlet. The MIIM Outlet Terminator is effectively a stuffer cap with in-built components that work exclusively in the Molex MIIM solution. It enables the MIIM system to determine circuit integrity to the work area outlet. Communications between the MIIM Outlet Terminator and the MIIM Scanner are transparent to the data channel and operate outside the Ethernet bandwidth. The MIIM system can function independently of the MIIM outlet terminator. However, the terminator provides enhanced functionality in terms of monitoring spare or unused channels.

- Confirms circuit integrity between the MIIM patch panel and the work area outlet
- Enables monitoring of changes and detects the presence of devices at the outlet
- Transparent to the Data Channel
- RoHS Compliant

Order No.	SAP No.	Description
IMT-00100	183220000	MIIM Category 6 Outlet Terminator (pack of 24)
IMT-00101	183220001	MIIM Category 6A Outlet Terminator (pack of 24)

MIIM Application Software

MIIM Application Software is a client server based Software program and is the central data manager for the MIIM System. It manages OSI Layer 1 assets and provides instantaneous information to the IT Manager regarding connectivity on MIIM enabled channels. The software documents planned and unplanned changes to the network. It allows continuous monitoring of the complete physical channel from work area outlet to the active network device. It automatically monitors all connections/disconnections, updates all MACs to the database, identifies and confirms port availability and notifies the IT Manager of all unscheduled or unauthorized network changes. Smart polling gathers device information attached to outlets and is triggered by updates to the scanner. The software allows global network access and cost effective network management.

- Hierarchal view of entire enterprise layer 1 infrastructure to the port/outlet
- Event monitoring of all connections/disconnections
- Smart polling keeps data current and minimizes network bandwidth usage
- Monitors connectivity and devices, even if the device is turned off
- Enables guided patching
- Search feature to easily locate assets and information
- Event logs for audit trails
- Layer 1 assets linked to building maps
- Open systems architecture can link with other network management applications
- Suite of management reports available
- Unrestricted number of users per license

Advanced Physical Layer Deployment INSIGHT

B

INSIGHT is an on-line information management system for the planning, procurement, deployment, change management, and documentation of data, electrical, voice, security, audio visual, building systems and telecommunication infrastructures.

It integrates workflow management, project management (planning, scheduling, estimating), document management, asset management, help desk and MAC management in an on-line service accessible to all stakeholders.

INSIGHT - Infrastructure Deployment and Lifecycle Management

INSIGHT drives visibility, control, automation, and collaboration during an infrastructure lifecycle, resulting in significant productivity gains in project and infrastructure management. With INSIGHT, infrastructure project predictability and throughput increases, confidence increases in the ability to deploy and manage efficiently and consistently, trust and collaboration are fostered among the stakeholders, employee and contractor turnover are less costly through on-line information transfer, and MACs are cost-reduced.

Infrastructure organizations face many challenges regarding their physical infrastructure and its connected assets:

- Project visibility, transparency and collaboration for the many stakeholders of multiple or large site deployments
- Retaining information on deployed infrastructure and assets
- Enforcing adherence to company processes and standards and compliance reporting
- Productivity of Project Managers
- Efficient contractor performance management

INSIGHT adds value to infrastructure investments by:

- Standardizing and controlling processes for high-value and multi-site infrastructure deployments
- Enforcing design standards and specifications while providing for site tailoring through approval processes
- Automating work flows, schedules, communications and documentation amongst all project stakeholders
- Managing on-line procurements with transparency and security
- Providing real-time visibility into infrastructure activities and expenditures under predetermined access privileges
- Providing a central library for all project and infrastructure data, bridging personnel and contractor changes
- Improving compliance reporting and accountability through real-time capture of project progress and approvals
- Supporting the creation of back-office infrastructure management services, lowering operating costs
- Managing all contractors efficiently and consistently by remote project management teams, including automatic billing notices

Copper Solutions

PowerCat™ 6A Shielded

Designed to support 10 Gigabit Ethernet (10GBase-T), Category 6A is an optimum speed structured cabling solution offering superior performance where speed, reliability, future proofing or long term tenancy is required, and is the system of choice for Data Centers, financial institutions and enterprises requiring the maximum

performance level for their businesses. The PowerCat 6A shielded solution is designed specifically for high speed data transmissions demanding little room for error, while offering exceptional alien crosstalk suppression, excellent insertion loss and protection against Electromagnetic Interference (EMI).

PowerCat 6A DataGate™ Shielded Jack

The DataGate Jack is the cornerstone of the Molex Premise Networks PowerCat C6A System performance. This modular jack offers superior alien crosstalk suppression, exceptional low insertion loss, and enhanced protection against electromagnetic interference (EMI). Protection is provided by utilizing a robust die-cast zinc alloy connector body housing.

This shielded jack features a unique spring-loaded shutter that not only protects it from dust and contaminants, but the ingenious spring-loaded design also ejects improperly seated patch cords. The product is dual color coded for either 568A or 568B wiring schedules and is backwards compatible with Shielded C6 and C5E systems.

- 360° Shielded RJ45 Jack
- Dual Color coding allows 568A/B wiring
- Patented IDC V-Shaped contacts that flex not fatigue when terminated
- Patented spring-loaded shutter
- RJ-11 compatible
- Accepts color coded port identification labels
- Supplied with all C6A patch panels
- RoHS Compliant

DataGate Shutter Operation

PowerCat 6A F/UTP Cable

- Supports high speed data network applications such as 10-Gigabit Ethernet (10GBASE-T)
- Enhanced performance overall single foil shielded twisted pair cable construction
- Minimizes alien crosstalk, provides excellent signal isolation and provides superior electromagnetic interference (EMI) protection.

- 1000 ft to 0 ft markers
- ETL verified to TIA-568-C.2 Cat 6A component compliance
- Resistant to alien crosstalk
- Color coded for ease of termination
- Enhanced performance overall single foil shielded twisted pair cable construction
- Available in UL Listed CMR and CMP constructions
- RoHS Compliant

Copper Solutions

PowerCat™ 6A Shielded

The PowerCat 6A system has been independently tested by ETL Semko for Category 6A performance to TIA/EIA-568-C.2 and ISO/IEC 11801 A1.1.

PowerCat 6A Patch Cords

Molex PowerCat 6A Shielded Patch Cords were specifically designed to support high speed data networks for 10-Gigabit Ethernet (10GBASE-T) applications. The patch cord is made from high quality shielded four pair 26AWG stranded wire. Available in a range of colors and lengths, PowerCat 6A Shielded patch cords are pre-terminated with RJ45 shielded plugs and feature slip-on anti-sag strain relief boots.

- Shielded 4 pair 26AWG stranded cable
- Pre-terminated with WE8W shielded plugs
- Anti-sag strain relief boots
- Suitable for EIA 568A/B wiring applications
- PVC jacket
- RoHS Compliant

PowerCat 6A Shielded Patch Panels

PowerCat 6A Patch Panels features the unique DataGate shielded modular jack. These panels offer superior alien crosstalk suppression, exceptional low insertion loss, and enhanced protection against electromagnetic interference (EMI).

Patch Panels are made from robust sheet metal and are supplied with removable rear cable management trays for cable strain relief and neat cable dressing, front and rear port numbering and individual ports may be color coded using connector icon labels for site specific network administration.

- Robust die-cast DataGate modular jacks with spring loaded cable clamps
- 24 port 1U & 48 Port 2U
- EIA 568A/B wired
- ETL Verified
- Standard 19" rack mount
- IDC contacts that flex not fatigue when terminated
- Pointed IDC towers to speed termination and enhance cable retention
- Integral cable management shelf ensures bend radius compliance
- RoHS

Copper Solutions PowerCat™ 6

Molex's Category 6 Product Range, PowerCat 6, is designed to meet or exceed the requirements of current international standards and has been independently tested and verified by ETL SEMKO for Category 6 component compliance.

The solution features cable, patch cords, patch panels and wall outlet solutions suitable for a wide range of territorial requirements.

PowerCat 6 UTP DataGate™ Jack

The DataGate jack is designed to maintain clean secure connections. The RJ45 jack features a patented 'spring-loaded shutter' which protects it from dust and contaminants as well as provides tactile feedback - the spring-loaded shutter pops out on an improperly seated patch cord - all with single-handed plug-in and removal. Available in ten colors, the DataGate jack utilizes patented IDC V-shaped contacts that flex not fatigue when terminated and provides molded category identification on jack face as well as optional port identification icons.

- ETL Verified
- Dual Color coding allows 568A/B wiring
- Patented IDC V-Shaped contacts that flex not fatigue when terminated
- Patented spring-loaded shutter
- RJ-11 compatible
- Accepts color coded port identification labels
- RoHS compliant

PowerCat 6 UTP Patch Cords

PowerCat 6 patch cords are manufactured using high quality unshielded 4 pair Category 6 stranded cable. Available in a range of colors and lengths, PowerCat 6 patch cords are pre-terminated with RJ45 plugs and feature cable strain relief boots with a plug latch protection cap. The slim boot design provides an effective solution to the problem of patch cord congestion in high density 1U active equipment. Ideal for hubs/switches where space between individual RJ45 jacks is limited.

- ETL Verified
- Unshielded 4 pair stranded cable
- Slim Boot Design
- Suitable for high density active equipment with limited space between individual RJ45 jacks
- Suitable for EIA 568A/B applications
- Various cable lengths available upon application
- RoHS compliant

Copper Solutions

PowerCat™ 6

Molex's Category 6 system product range - PowerCat 6 - is designed to comply with the Category 6 standards: TIA-568-C.2, ISO/IEC 11801:2002 and AS/NZS 3080:2002.

The Molex Category 6 system is independently tested and verified by ETL Semko to ensure continuous compliance to channel performance criteria.

PowerCat 6-250 U/UTP Cable

- Supports ultra high speed data networks such as Gigabit Ethernet (1000 BASE-T/1000 BASE-TX) swept to 250MHz
- Full duplex operation capable over four cable pairs
- 1000 ft to 0 ft markers
- Supplied in convenient 1000 ft. (305m)
- Specified and tested to 250MHz
- ETL Verified
- 23 AWG Conductors for improved Insertion Loss Performance
- Overall diameter of .20"
- Available in white, blue and light gray sheaths for application versatility
- UL listed and verified
- RoHS compliant

PowerCat 6-500 U/UTP Cable

- Supports ultra high speed data networks such as Gigabit Ethernet (1000 BASE-T) swept to 500MHz
- Features innovative pair twisting to ensure optimum Return Loss and NEXT performance and maintains pair twist rate during installation
- Incorporates central spine maintaining pair separation during installation to ensure premium performance
- ETL Verified
- RoHS compliant
- Supplied in convenient 1000 ft
- UL Listed & Verified
- 23 AWG Conductors for improved Insertion Loss Performance
- Available in white, blue and light gray sheaths for application versatility
- 1000 ft. to 0 ft, markers
- Specified and tested to 500MHz

PowerCat 6 Patch Panels

PowerCat 6 Patch Panels feature the shuttered DataGate Jack which is dual color coded for either 568A or 568B wiring. The panels come complete with an integral cable management tray for cable strain relief and tidy cable dressing. Available in 24 or 48 port versions, with front port labelling. Individual ports can be color coded using an icon for site-specific network administration.

Angled Patch Panels are ideal for installations of high density or which utilize extensive side and end-of-the-rack cable management. The angled feature provides enhanced port access and minimizes patch cord bend radius to the rack. Each port features a patented spring-loaded shutter and can be color coded using an icon for site specific network administration. The panel provides both front and rear port number identification.

- DataGate shuttered modular jacks
- ETL verified
- RoHS compliant
- 24 Port 1U, 48 Port 2U
- EIA 568A/B color coded
- Integral rear cable management
- Standard 19" rack mount
- Graphite gray finish

PowerCat 6 Keystone Patch Panel

The Molex 24 Port Modular Keystone Jack patch panel is a flexible patching solution for small to medium size installations. The panel is shipped unloaded and can be configured to provide the exact number of ports required. The Keystone Jacks snap in easily and can be removed if required.

The patch panel features an integral rear cable management tray for ease of installation and cable dressing. Port identification can be provided by utilizing the silk screened areas shown on the front of the panel.

- Available in 24 port, 1U
- Modularity provides installation flexibility
- Easy snap in Keystone Jacks
- Graphite gray finish
- Integral rear cable management
- RoHS compliant

89D 12 Port Patch Panel

The 89D Patch Panel is a 12 port patch panel which is mounted into an 89D bracket. The patch panel is ideal for smaller applications, such as a branch or small office environment. A vertical configuration utilizes IDC terminations and printed circuit board. Once the bracket is mounted onto the wall, the patch panel can be snapped in for port access or in reverse for cable access. Plastic cable ties can be used for cable management.

- 12 port configuration
- Rear IDC technology
- Both 568A and 568B applicable
- Wall mountable
- RoHS compliant

Copper Solutions MOD, Multimedia and Router Panels

The Molex MOD & Multimedia system provides a complete range of products to facilitate a complete voice cabling system, including; patch panels, termination modules, mounting frames, distribution boxes, tester interfaces and over-voltage protection.

MOD Patch Panel

MOD Patch Panels provide simple, easy to use closet cross connects that convert 50-position feeder cables to individual modular jack channels. They are available in 2, 4 and 8 wire (24 AWG) polarizations. All wiring is totally enclosed. A Velcro cable retainer allows 50-position installation without tools. Standard product comes with 50-position female receptacles on rear of patching. Available for USOC, 568A, 568B or 10BASE-T sequences.

- Available in 24 port, 1U
- Available in 2,4 and 8 wire polarizations
- All wiring is totally enclosed
- Standard product comes with 50 position female receptacles
- Available for USOC, 568A, 568B or 10BASE-T sequences

PDS Solutions Category 6

The Category 6 Premise Distribution System incorporates a unique pair separation design on the 4 Pair connector. This unique design feature enables 96 pairs to a base, making it one of the highest density Category 6 pair management blocks on the market.

The Molex Category 6 PDS system is independently tested and verified by ETL Semko to ensure compliance to channel and component performance criteria according to international standards.

Category 6 4 Pair IDC Connectors

The 4 Pair IDC block is a high-performance connector capable of providing high-speed data transmission. The design utilizes split-pair technology to provide Category 6 performance.

- High performance IDC
- Independently tested
- Gas tight termination

Order No.	SAP No.	Description
KPD-00088	0181980071	110-Category 6 C4 Connectors (Bag of 100)

Category 6 PDS 96 Pair Termination Block Kits

The 96 Pair Termination Block Base is the key component of the C6 PDS system and has the same footprint as the Category 5E 100 Pair Termination Block Base. Category 6 performance is guaranteed by the unique pair separation (for the reduction of cross-talk) designed into the base. Manufactured from flame retardant thermoplastic, the termination block base features cut-outs for easy cable routing and is available with or without legs. Supplied with label cards and label holders and 24 4 Pair IDC connectors.

- Industry standard wall mount format
- Available with or without mounting legs
- Supplied with label cards and holders
- Features cut-outs for cable routing
- Available as a kit with IDC connectors or as stand alone bases

PDS Solutions

Category 6

Category 6 PDS Patch Cords

Category 6 PDS Patch Cords are available as 4 Pair to 4 Pair assemblies or 4 Pair to RJ45 variants. The Category 6 PDS Patch Cord is polarized to prevent accidental reversal of the cord - a molded-in arrow on the top of the connector provides a visual indication of the correct orientation. Integral strain relief holds the cable in place during lacing and provides proper cable retention for the terminated Category 6 PDS connector.

- 4 Pair - 4 Pair & 4 Pair - RJ45 variations available
- Circuits can be easily changed by untrained personnel without using a punch down tool
- Available in 1, 2, 3 and 5m lengths

KPC-00175	0180420095	110 Style Patch Cord, 4 pair to RJ45, C6 5m- Gray (bag of 1)

Multi-Pair Category 6 PDS IDC Connector Termination Tool

The multi-pair termination tool is designed to terminate the Molex Category 6 4 Pair IDC connector providing a gas tight, reliable, high impact termination.

The uniquely designed Molex Category 6 IDC connector can only be terminated with the specifically designed Molex multi-pair termination tool.

For terminating individual pairs a standard 110 style termination tool can be used.

- For use solely with Molex Category 6 PDS 4 Pair IDC Connector
- Provides gas tight, reliable, high impact termination
- Tool head compatible with standard 110 handle

Order No.	SAP No.	Description
KPD-00087	0181980070	Category 6 110 Style Multi Pair Termination Tool with head & handle
KPD-00086	0181980069	Category 6 110 Style Multi Pair Termination Tool replacement head

PDS Solutions

Category 5E

110 PDS

D

The 110 IDC is a defacto standard used by many cabling vendors, and is broadly used in voice, data and building services cabling systems. The Molex 110 system is fully compatible with all other 110 style systems enabling deployment into existing systems for expansion or

refurbishment programs.

Category 5E 110 PDS Connectors

Molex's 110 Style Connector is a high-performance IDC capable of providing all your voice and data interconnect needs. It has been independently tested to EIA/TIA standards to assure a gas-tight, Enhanced Category 5 connection. The Molex 110 style connector is fully compatible with other 110 style components, including; 110 style bases, tools, patch cords and test heads.

- Industry standard wall mount format
- Available in 4 pair (8 pos) and 5 pair (10 pos) versions
- Enhanced Category 5 performance compliant
- IDC contact accepts one conductor only
- RoHS compliant

Order No.	SAP No.	Description
KPD-00058	0181980022	110-Category 5E C4 Connectors (bag of 100)
KPD-00059	0181980023	110-Category 5E C5 Connectors (bag of 100)

KPD-00045

Category 5E 110 PDS Termination Block Kits

The 100 Pair Blocks are the key component in wall mount 110 Premise Distribution System (PDS). The solidly constructed unit has the unique 110 connector which allows punchdown with most standard tools and has several convenient features. These include wiring strips that are marked to quickly identify 5 pair groups when lacing 25 pair backbone cable and designation strips marked for 1, 2, 4 and 5 pair connectors that are available in colors to easily identify specific sections of the PDS installation.

- Industry standard wall mount format
- Available with or without mounting legs
- Features cut-outs for cable routing for easier installation and enables cable sheathing to be maintained down to 25mm
- Available as a kit with IDC connectors or as a stand alone base
- Supplied with label cards and holders
- RoHS compliant

Order No.	SAP No.	Description
KPD-00045	0181980031	100 Pair Block Kit with legs & with 24 110 Style Category 5E C4 connectors
KPD-00046	0181980032	100 Pair Block Kit with legs & with 20 110 Style Category 5E C5 connectors
KPD-00047	0181980033	300 Pair Block Kit with legs & with 72 110 Style Category 5E C4 connectors
KPD-00048	0181980034	300 Pair Block Kit with legs & with 60 110 Style Category 5E C5 connectors

110 PDS Rack Mount Panels

This cross connect system combines the advantages of a block-based system with frame mounted active equipment. This block-based format affords individual cable pair management not possible with an RJ patching field: the installer has the advantage of defining cross connections as either 1, 2, or 4 pair at the installation stage rather than at the initial design stage.

- Industry standard wall mount format
- Standard 19" rack mount
- Enhanced Category 5 performance
- 200 pair capacity
- Supplied with label cards and holders
- 3U - small cable management rings for low density applications
- 4U - large cable management rings for high density applications
- RoHS compliant

Free Space Optics Canobeam™

Canobeam is a free space optics solution that provides a point-to-point wireless optical beam transmission system. Typically set-up to transmit data between two structures, Canobeam is ideally suited where no fiber is available, where fiber is too costly, and for back-up transmission systems and

disaster recovery systems. Canobeam is a highly reliable and secure technology. It is also protocol independent and transmits any higher layer protocol including Ethernet, SDH, ATM, TCP/IP up to Gigabit speeds.

Model MFSO-110

The Canobeam family incorporates real-time beam auto tracking to provide high availability point-to-point wireless connectivity, designed to support high speed applications. As part of the Molex total structured cabling solution, Canobeam is ideal for campus and building-to-building connectivity as either a primary or backup backbone link. The robust Canobeam can be installed outside or in a window for point-to-point applications.

- Protocol Independent
- Supports transmission speeds of 25 to 156 Mbps
- Reliable transmission distances of 20 to 500 meters
- Real time auto tracking function maintains beam alignment compensating for changes in the installation due to environmental factors
- Requires no radio frequency allocations, permits or licenses
- Highly secure data links
- Economical installation and operating costs
- SNMP Management available

Order No.	SAP No.	Description

Loose Tube Cable

Molex Advanced Fiber Optic Loose Tube Indoor/Outdoor cables utilize dry water blocking technology and super absorbent polymers rather than traditional petroleum based gels both inside the fiber tubes and the core of the cable. Molex offers designs for both plenum (OFNP) and non-plenum (riser/OFNR) flame rated applications while meeting the demanding requirements for outside plant installations. The versatile design allows users to install a single cable for both their indoor and outdoor environments without mechanical or optical compromise.

- All Dielectric cable construction requires no grounding or bonding
- Totally dry water blocked cable requires no cleaning of gels while fully meeting water blocking requirements of gel filled cables
- No transition required from outside plant cable to tight buffered flame rated indoor cable
- No transition means material cost savings, labor savings and optical loss budget savings
- RoHS compliant

NON-PLENUM-OFNR

Optical Fiber Solution Lightband™

Molex's advanced manufacturing process provides exceptional performance in patch cord assemblies. Molex maintains strict control over the ferrule endface surface.

Optical Fiber Patch Cords

Molex offers a comprehensive range of Fiber Optic Patch Cords in both standard and custom construction. Refer to the Special Construction Matrix Model to configure custom patch cords.

- Available with popular SC, LC, ST and MT-RJ connectors
- Flexible, small OD 2mm x 4.1mm mini cordage
- Insertion Loss - Singlemode: 0.40 dB per connector
Multimode: <0.30 dB per connector
- All assemblies are 100% factory tested
- Test results included with all patch cords
- RoHS compliant

Optical Fiber Solution Lightband™

Molex offers a wide range of fiber optic pigtails in both standard and custom construction. Standard constructions are available with the popular LC, SC and ST connectors on 900µm buffered fiber in four glass types. All our fiber optic pigtails are RoHS compliant.

Specification Grade Fiber Enclosures

Specification Grade Fiber Optic Enclosures are a configurable rack mount unit for storing and terminating incoming fiber cable. Designed to accommodate both the needs of the installer for the initial assembly and the end user for access, maintenance and fiber protection. Great care has gone into the design to protect fiber optic cables and patch cords from damage and to maintain stable optical integrity throughout the life and use of the enclosure.

- Standard 19" rack mount
- Lightweight, lockable, and removable aluminium hinged front and rear doors provide security
- Externally mounted cable strain relief bracket mounts to accommodate cable routing from above or below
- Labelling incorporated on hinged, drop-down metal front door
- 1U Fiber Enclosure - accommodates up to 4 6-Pak plates, 4 ModLink™ Cassettes & 2 Splice Trays
- 2U Fiber Enclosure - accommodates up to 8 6-Pak plates, 8 ModLink Cassettes & 8 Splice Trays
- 4U Fiber Enclosure - accommodates up to 24 6-Pak plates, 24 ModLink Cassettes & 12 Splice Trays

Standard Grade Rack Mount Fiber Enclosure

Standard Grade Fiber Enclosures configurable rack mount units for storing and terminating incoming fiber cable. The Standard Grade Rack Mount enclosures accept up to 8 Pak/Adapter plates.

- Utilized with Fiber Pak/Adapter Plates which allows multiple fiber connector options and configurations - 2U accommodating 8 Fiber Pak/Adapter Plates or Modlink cassettes
- Hinged Plexiglas front door
- Fully removable top/rear panel for easy cable access
- Fully configured to accept either three, six or eight Molex Fiber Pak/Adapter Plates
- Print ready port labeling sheet
- RoHS compliant

Standard Grade Rack Mount Fiber Enclosure

Standard Grade Fiber Enclosures configurable rack mount units for storing and terminating incoming fiber cable. The Standard Grade Rack Mount enclosures accept up to 8 Pak/Adapter plates.

- High density, economic, 48 fiber enclosure
- Compatible with all common fiber adapters
- Manufactured from high-strength, lightweight material
- Bottom half of panel pivots out for access to splice tray and pigtail routing area
- No additional cable management or splicing accessories required
- All common adapter types: LC, SC and ST are assembled into interchangeable front plates that accommodate 6 simplex or 12 duplex adapters each.
- RoHS compliant

Optical Fiber Solution Lightband™

Patch/Splice Demarcation Cabinet

The Patching/Splicing Demarcation Cabinet provides a central point for interconnecting and/or splicing fiber optic cables. The cabinet features an integral panel that accepts Fiber Pak/Adapter Plates, Modular Splice Cassettes and ModLink cassettes for field configuring the unit for a variety of connector types. For ease of installation, the door is removable. The cable management area includes a keyed lock for security.

- Utilizes 6 and 12 Fiber Pak/Adapter Plates or Modlink cassettes
- Accommodates any combination of up to twelve (12) 6 or 12 fiber Adapter Plates, Modular Splice Cassettes and Modlink Fiber Cassettes
- Keyed lock for security
- RoHS compliant

Order No.	SAP No.	Description
WFR-00023	0180090010	72 Point Demarcation Patch Unit

Standard Grade Wall Mount Fiber Enclosure

The Standard Grade Wall Mount enclosures are configurable wall mount units for storing and terminating incoming fiber cables.

- Accommodates up to four (4) 6 or 12 fiber Adapter Plates
- Divided and individually opened input and output demarcation areas
- 2 cable management spools
- Top and bottom cable entry points
- Low profile and lockable
- RoHS compliant

MMI-R

The MMI-R is a compact wall mounted unit for storing and protecting optical fiber. The internal storage spool easily holds 1.5 meters of up to 12 fibers with 900 micron buffers. Both units accept up to 6 USO II modules (ordered separately) and can be configured for multimedia using a combination of UTP, ST, and coax adapters, placing all outlets in one centrally located unit. Ideal for fiber-to-the-desk consolidation point for clustered furniture. The MMI-R has a graphite gray powder coated steel cover that overhangs and protects the lower module positions.

- RoHS compliant

Order No.	SAP No.	Description

Optical Fiber Solution Lightband™

601 Fiber Series

The 601 Fiber Series wall mount system interface products are compact units for optical fiber. The 601 fiber enclosure has a low profile design and provides the proper internal fiber management to ensure the integrity of the optical network. There is also provision for a user supplied seal for added security.

- Compact with lock option
- Multimode and Singlemode configuration
- Top, bottom and rear access
- RoHS compliant

Optical Fiber Solution Lightband™

Molex makes it easy to field configure many of its fiber optic products by offering an extensive line of Adapter Plates. The plates are loaded with high quality adapters and require no tools—the plates install with a simple snap rivet, making installation and/or changes simple.

6-Pak Adapter Plates

6-Pak Adapter Plates fit directly into most Molex fiber management enclosures and are compatible with the Modular Splice Cassette housing and Lid (AFR-00380). The simple design requires no tooling as the plates install with a simple snap rivet.

- RoHS Compliant
- Accommodates 6 or 12 fibers
- Available in Singlemode & Multimode versions
- For use within Molex's Fiber Management Systems

Optical Fiber Solution Lightband™

Universal Splice Tray

The Universal Splice Tray is a configurable enclosure for both mechanical and fusion splices. Each tray includes two fusion splice sleeves and two mechanical splice sleeves. Loose tube cable is routed into and out of the tray through adjustable tube grips located at each corner. The tube grips eliminate the need for separate cable ties and are easily tightened and loosened in order to prevent over-compression of the loose tube cable. Each tray accepts 12 fusion or 10 mechanical splice terminations.

- Accepts mechanical and fusion splices
- Adjustable grips on each corner
- Prevents over-compression of the loose tube cable
- Accommodates up to 12 splices

Optical Fiber Breakout Kits

Optical Fiber Breakout Kits are for use on multi-fibers-per-tube loose tube cables to modify the cable for direct termination. Each kit breaks out 250µm fibers from a multi-fiber loose tube into individual 900µm buffer tubes. The fibers can then be terminated using the connector manufacturer's recommended termination procedures for 900µm tight buffered fibers. Each kit is individually packaged in a sealed plastic bag.

Order No.	SAP No.	Description

Pre-Terminated Solutions

ModLink™ Fiber Plug & Play

ModLink is an ideal solution for mission critical applications such as Data Centers and Storage Area Networks, where fast installation is paramount and where moves adds and changes are frequent or managed in-house.

ModLink is also a viable tool for rapid deployment of an alternate data recovery system. In the event of damage or failure to a vital fiber backbone, the link can be quickly re-established without the need of technicians.

ModLink Cassette

ModLink is a cost-effective, quick and easy fiber system, for backbone and to-the-desk applications. The ModLink system provides premium factory controlled optical performance, enabling flexible system configuration and fast, economical installation. Simply plug the cable into the rear of the unit and the link is operational - an excellent solution for fast-track installations.

- Self-contained fiber optic patching enclosures convert the MTP/MPO interface to a standard SC, LC, ST and MT-RJ coupler
- Industry-leading low insertion loss (0.75dB insertion loss per cassette for Laser Optimized OM3 Cassettes)
- For use within Molex's Fiber Management Systems - See Page G-6
- Front port identification plus labelling field on cassette top for fiber documentation

48 Port Quad LC ModLink Panel

The 48 Port Quad LC ModLink Panel is a self contained patching enclosure which converts four MTP/MPO interfaces to twelve standard Quad LC adapters. The LC ModLink panel offers industry leading low insertion loss and features robust slack management enabling up to 5 meters of cable, per individual cable, to be stored.

- Self-contained fiber optic patching enclosures convert the MTP/MPO interface to a standard LC adapter
- Easy snap in removable slack management accessories designed to store up to 5 meters of Molex ModLink cable
- Industry leading low insertion loss (0.75dB)
- RoHS Compliant
- Available in Singlemode & Multimode versions
- Panel mounts flush to rails - no interference

ModLink Cables

- Plenum rated cables are factory terminated on both ends with multi-fiber MTP® connectors for maximum fiber density
- Round, flexible outer jacket is easy to bend, route and install
- Plenum (OFNP) flame rating allows for routing cables in any indoor environment where local code allows

- Industry-leading low insertion loss (0.5dB) Maximum Insertion Loss for Laser Optimized OM3 Cables
- Cables available in 12 fiber versions
- ModLink Advanced fiber Optic Cables are 100% tested
- Optional pulling eyes installed to protect the assembly during installation
- 4.5mm jacket
- RoHS compliant

Pre-Terminated Solutions

Molex Pre-Terminated Fiber Optic Leads offer premium factory-controlled optical performance on a variety of connectors that enable fast, economical installation. Pre-Terminated leads are ideal for mission-critical backbone applications such as data center tie cables and low optical loss

backbone riser cables.

Pre-Terminated Fiber Optic Leads

- Available in 50/125µm and 62.5/125µm Multimode and 9/125µm Singlemode fiber versions
- Fibers compliant to ISO/IEC 11801 fiber specifications
- Wide variety of connector and cable types offered
- Cable length built to customer requirements
- Premium factory optical performance guaranteed
- All assemblies are 100% factory tested
- Factory test results shipped with every assembly
- RoHS compliant

Construction Matrix Model - Substitute the correct code number or letter to determine the assembly construction

Modular Splice Cassettes

Molex's Modular Splice Cassette is an excellent way of managing vulnerable optical fibers, protecting them from dust and damage as a result from routine maintenance. The modular design is upgradeable and reusable. The Cassette is available in a number of pre-loaded kits or in a unloaded configuration.

- Fully integrated into Molex's Specification Grade Enclosures
- Maximizes Density - Maximum 24 Fiber Capacity
- Provides Perfect Bend Radius for splices
- Integrated Cable Management - prevents damage

Pre-Terminated Solutions ModLink™ Copper Plug & Play

Factory terminated Plug & Play solutions offer enterprises a number of advantages over traditional cabling systems - deployment is faster, performance is guaranteed, on site testing is eliminated. Plug and play solutions are ideal for installations where quality and speed of implementation are paramount and

are ideal for high density environments such as data centers, storage area networks (SAN's) and server rooms. The ModLink Copper Plug & Play solution when installed in a channel configuration has been tested by ETL Semko as compliant with IEE 802.3ab-1999 for Zero Bit Rate 1000 Base-T transmission.

Copper ModLink Panels

The 48 port ModLink Copper Panel consists of 4 12 port or 4 6 port ModLink Copper cassettes loaded into a 1U Rack Mount Enclosure. The cassettes slide easily in and out of the panels, allowing speedy installation. Simple cassette design allows for fast upgrades or expansion of systems with minimum installation time. All cassettes are 100% factory tested, enabling flexible configuration and cost effective installation, while minimizing the need for on-site testing.

- Utilizes the patented Molex iPass™ connector
- Modular Cassettes convert the iPass interface to a standard RJ45 interface
- ModLink panels are modular in design and accept up to 4 ModLink cassettes
- Panels feature integral rear cable management
- Cassettes are configured with either 6 or 12 ports
- 100% factory tested

Hydra Cable Assemblies

Hydra Cable assemblies are comprised of 6 RJ45 plugs to an iPass connector on the other end. They are specifically designed to connect Molex's range of ModLink copper cassettes from panel to panel or from the switch to the panel links.

- Hydra cable assemblies feature patented iPass high density, robust die-cast connectors on one end & 6 RJ45 plugs on the other end
- 100% factory tested
- Custom cable assembly lengths in increments from 1m - 90m, enabling flexible configuration and cost effective installation
- Available in CMP and CMR cable types.

Work Area Solutions

Decora & 106 Style Wallplates

Decora Style Wallplates

Decora Style Wallplates are designed to fit standard decora style electrical cover plates in applications where voice and data ports are used instead of electrical outlets.

Available in two and four port configurations, Decora style wallplates utilize DataGate jacks and single-position fiber and copper modules. Decora style wallplates are UL-approved and are rear-loading to resist tampering. Each wallplate comes supplied with alpha icons which are recessed when installed. Voice and data icons are also available. All icons are available in multiple colors to match DataGate jacks and to assist in application recognition.

- Accommodates DataGate Jacks - See Section C
- Accommodate SC, LC, ST single position fiber modules - See Page H-6
- Fit standard decora style electrical cover plates
- Accommodates media configurable modules - See Page H-5
- Rear loading to reduce tampering
- RoHS compliant

Copper Modules for Synergy™ Series

Molex offers a comprehensive range of copper-to-the-desk modular systems to suit all applications and market requirements. Elegantly designed, these products offer a low profile and versatile modular construction, allowing the user to easily expand the network as it grows.

Single Synergy Copper Modules

Single Synergy modules are versatile, industrially designed inserts for use across a broad range of Molex product, including wallplates, patch panels and modular furniture outlets. Single Synergy modules are rear loading.

Compatible with:

- Synergy family
- USO II family
- Streamline family
- Modular Furniture Outlets, Boxes & MUTO
- Multimedia Patch Panels
- Standard color white
- RoHS compliant

Fiber Modules for Synergy™ Series

Molex offers a comprehensive range of fiber-to-the-desk modular systems to suit all applications and market requirements. Elegantly designed, these products offer a low profile and versatile modular construction, allowing the user to easily expand the network as it grows.

Supporting SC, LC, ST and MT-RJ fiber adapters, Molex's work area solutions are suitable for both Singlemode and Multimode installations and include Molex's unique "shuttered" technology protecting the user from harmful light emissions.

Single Synergy Fiber Modules

Designed for use within the Molex Synergy range of wallplates and surface blocks, SC jacks are available in five colors and provide singlemode and multimode performance.

- Synergy family
- Multimode & Singlemode configuration
- Designed to fit into Synergy, Streamline & USO II system of wallplates and surface blocks - See Section H
- Standard color white
- SC adapter available with or without shutter
- RoHS compliant

USO II Modules

The USO II multimedia outlet system is a comprehensive group of modular products which can be easily configured and reconfigured without removing the faceplate bezel. For maximum versatility, USO II outlets have a three-part design: bezel, fascia and jacks. USO II bezels fit all standard US 1 and US 2 wall boxes. USO II modules make it easy to customize outlets for any UTP or fiber application. Modules can be purchased either pre-configured or can be built by purchasing either 1U 1 Port or 1U 2 Port fascia and inserting DataGate Jacks.

Compatible with:

- Synergy family
- USO II family
- Uni-Fit Modular Furniture Outlets
- Modular Furniture Outlets, Boxes & MUTO
- USP Panels
- RoHS compliant

Multi User Telecommunications (MUTO)

The Multi User Telecommunications Outlet (MUTO) is the ideal solution for high density fiber or UTP applications in the office environment. This sleek product holds up to 12 USO II modules and is easily mounted near file servers, hub products and workstations. For added flexibility, the outlet can be mounted over US1 Single gang boxes or onto power poles. For fiber solutions, the MUTO only accepts angled fiber modules of which up to 6 2U modules can be loaded.

- Easily configured/reconfigured from the front
- Holds up to 12 USO II modules
- Holds up to 6 2U angled fiber modules
- RoHS compliant

Industrial Solutions

Molex's Industrial Solutions are specifically designed for installations within harsh environments. Ideally suited for manufacturing facilities, water treatment plants, transportation hubs and food and beverage facilities, the industrial solution features a unique bayonet latching system that ensures

network performance is constantly maintained.

Industrial Copper Assemblies

Enabling side and rear entry termination the connector is housed within a rugged Polyester covering. Plugs and patch cords are housed within a rugged polyester covering and features a bayonet style latch receptacle for quick and easy connection and proper mating depth. The latching mechanism provides one sealing surface which protects the connector from dust, moisture, dirt, vibration, chemicals, electromagnetic interference and temperature extremes, reducing the likelihood of product failure.

- Category 5E
- One sealing surface
- Bayonet style latch receptacle
- Suitable for extreme environments
- Water and dust tight for functional integrity
- RoHS compliant

Industrial Fiber Assemblies

Designed with rugged and compact housings, Molex's optical industrial LC duplex assemblies incorporate the high performance of a fiber optic connection with the versatility of a rugged industrial connector. The bulkhead adapter mounts directly in a panel cut-out, serving as a sealed feed-through. The removable connector provides sealing between both the adapter mating-surface as well as the cable exiting the connector. Molex's optical industrial assemblies are compatible with many fiber types and cable constructions and ideal for both indoor and outdoor applications. This assembly is particularly well-suited for long distances or remote connections up to 300 Kilometers distance, using Multimode fiber and over 1 Kilometer distance using Singlemode fiber.

- Available in Singlemode & Multimode versions
- LC connector designed to Telcordia GR-326-CORE
- Suitable for indoor and outdoor applications
- Suitable for extreme environments
- Water and dust tight for functional integrity
- RoHS compliant

Cable Management Solutions

Cable Management is an important part of any installation. Combining aesthetics with functionality, the Molex range of rack mountable cable management products offer cable management with minimal effort, ensuring long term manageability of the wiring closet.

Vertical Rack Manager (VRM)

Used in conjunction with the Molex 42U, 19 inch Open Bay Rack, or equivalent, the VRM provides a robust and efficient way of managing cables and patch cords. It's ergonomic design ensures the necessary support for bundled patch cords, moving them from panels to the frame, maintaining bend radii at all times. Cable routing is flexible, and rapid re-routing can be achieved via the Quick Fit cable spools. Quick snap finger grooves enable flexible equipment management, and allow for expansion from 1U to whatever size required.

- Fits EIA standard 19" open bay racks
- Allows for upgrading current installations while maintaining current investment in hardware
- Maximizes building Infrastructure
- Excels in space utilization, by increasing density and freeing up valuable floor space
- Strong & flexible poly carbonate finger guides
- Robust but light-weight construction holds cables perfectly aligned against each individual patch panel maintaining critical bend radii
- Snap grooved finger guides allow easy modification to 2/3 U configuration. With replacements finger guides ensures ongoing flexibility for future fit-out requirements
- Cable retainers click on to the end of finger guides, ideal for holding cables horizontally in place while undertaking maintenance
- A quick lock door allows for fast easy access by allowing instantaneous left or right door opening with flush mounted handles
- Quick fit spool which allows easy single handed fit and removal of spools saving time and effort
- The design allows flexibility in fit out with additional spools and door kits available

Cable Management Straps

Cable Management Straps are used for securing vertical cables at the end of rack groupings. Constructed of Velcro, the straps are mounted to the rack utilizing the existing hardware.

Order No.	SAP No.	Description
35.B0270	0180400038	8" Cable Management Straps (bag of 25)

Equipment Shelves

The Double Sided Solid Equipment Shelf supports up to 135kg (300lbs). It adjusts for wall or 19" rack mounting. When rack-mounted, the shelf aligns flush with the front of the rack and occupies one rack position (plus height of equipment supported). The side supports offer extra equipment security. Ideal for supporting a computer monitor. The Single Sided Solid Equipment Shelf supports up to 45kg (100lbs). It is 19" rack mountable so that half the unit protrudes from the front of the rack while the other half protrudes from the back of the rack. The shelf occupies two rack positions (plus the height of equipment supported). Ideal for use as a "desk" within the rack.

- 19" rack or wall mount flexibility
- Flush or Center Mounting
- Ideal partners for computer equipment
- RoHS compliant

SLT3™ Single Line Tester

The SLT3 Tester is a rugged, lightweight product designed to verify the integrity of 1, 2, 3, and 4 pair UTP channels. Incorporating a unique 3-in-1 design, this tester features built-in modular jacks for USOC, EIA 568A and 568B wiring sequences.

Simply connect the master and slave unit to each end of the cable under test, and the SLT3 automatically verifies correct cable sequence, as well as open and short circuits.

- Innovative 3-in-1 design features modular jacks for testing USOC, EIA 568A and 568B cabling systems
- Accurately verifies the continuity and sequence of 1, 2, 3 and 4 pair UTP and Shielded channels
- Continuously-sequencing LED display provides a diagnostic read-out that immediately detects shorts, opens, reversals and mis-wires at a glance
- Available in UTP and Shielded versions
- RoHS compliant

Order No.	SAP No.	Description
33-100	0180390001	SLT3 UTP Single Line Tester
33-100-P	0180390003	SLT3 UTP Carry Case
33A-100-10	0180390011	SLT3S Shielded Tester (Master and Slave Units) with 9 Volt battery

Pocket Fault Locator

The Pocket Fault Locator is designed for either Singlemode or Multimode use. This pen-sized unit allows you to visually locate micro-bends, fiber breaks and other sources of optical attenuation in fiber patch cords, patch panels and enclosures.

- Visible 650nm Laser
- Small pocket sized design
- Continuous or Modulated Light Source
- Supports Singlemode & Multimode applications
- Battery operated
- 2.5mm Universal Ferrule Adapter

Order No.	SAP No.	Description
