● Part Numbering (The structure of the "Global Part Numbers" that have been adopted since June 2001 and the meaning of each code are described herein.) If you have any questions about details, inquire at your usual Murata sales office or distributor.

CERAFIL[®] for AM

(Global Part Number)

PF	W	LA	450K	P2A	-B0
①	②	③	④	⑤	⑥

① Product ID

Product ID	
PF	Ceramic Filters
SF	Ceramic Filters
CF	Ceramic Filters

② Oscillation/Numbers of Element

Code	Oscillation/Numbers of Element
S	1 Element Length mode
W	2 Elements Length mode
U	1 Element Area Expansion mode
Z	2 Elements Area Expansion mode
P	4 Elements Area Expansion mode

③ Structure/Size

Code	Structure/Size
L□	Lead Type
C□	Chip Type

□ is "A" or subsequent code, which indicates the size. It varies depending on vibration mode and number of elements.

④ Nominal Center Frequency

Expressed by four-digit alphanumerics. The unit is in hertz (Hz). Capital letter "K" following three figures expresses the unit of "kHz".

CERAFIL[®] for Search-stop Signal Detection

(Global Part Number)

BF	U	LA	450K	C	-B0
①	②	③	④	⑤	⑥

① Product ID

Product ID	
BF	Resonator

② Oscillation/Numbers of Element

Code	Oscillation/Numbers of Element
U	1 Element Area Expansion mode

③ Structure/Size

Code	Structure/Size
LA	Lead Type Standard

④ Nominal Center Frequency

Code	Nominal Center Frequency
450K	450kHz

⑤ Product Specification

Code	Product Specification
P2A	Standard Type

□□A indicates standard type.

⑥ Packaging

Code	Packaging
-B0	Bulk
-R0	Plastic Taping (ø180mm)
-R1	Plastic Taping (ø330mm)
-A0	Radial Taping H ₀ =18mm
-M0	Magazine Cassette

Radial taping is applied to lead type and plastic taping to chip type. With non-standard products, three-digit alphanumerics indicating "Individual Specification" is added between "⑤Product Specification" and "⑥Packaging".

⑤ Product Specification

Code	Product Specification
C□	Bandwidth

With standard type, □ is omitted.

⑥ Packaging

Code	Packaging
-B0	Bulk

Radial taping is applied to lead type and plastic taping to chip type. With non-standard products, "Individual Specification (serial number)" and "Lead Shape (Lead Bend : B)" are added between "⑤Product Specification" and "⑥Package Specification Code" upon specification.

Ceramic Filters (CERAFIL®) for AM Receivers

muRata

1

Chip Type PFWCC Series

PFWCC series for AM use is one of the most recommendable intermediate filters, having such distinctive features as high selectivity, high stability, and adjustment-free operation. Additionally its easy matching with IC helps create an easy circuit design. This is the most recommendable for portable radio with small package. Especially, reflowable with SMD package.

■ Features

1. Center frequency range between 450 and 470 kHz are available standard tolerance of is ± 2 kHz.
2. For frequency synthesizers, center frequencies of 450, 459 and 468 kHz are available standard tolerance of ± 1 kHz.

PFWCC450KS2A-B0

Part Number	Center Frequency (fo) (kHz)	3dB Bandwidth (kHz)	Selectivity (+) (dB)	Selectivity (-) (dB)	Insertion Loss (dB)	Elements
PFWCC450KS2A-B0	450 ± 2.0 kHz	within 5.5 ± 1.5 kHz	17 min.[fo+9kHz]	17 min.[fo-9kHz]	6 max.	2

Center frequency(fo) is defined by the center of 3dB bandwidth.

For safety purposes, connect the output of filters to the IF amplifier through a D.C. blocking capacitor. Avoid applying a direct current to the output of ceramic filters.

■ Standard Land Pattern Dimensions

The solder resist should be printed except for the land pattern on the P.C.B..
The material of P.C.B. is the epoxy resin of glass fabric base (t=0.8mm)

■ Notice (Soldering and Mounting)

1. Standard Reflow Soldering Condition

(1) Reflow

Filter is soldered one time within the following temperature condition and then being placed in natural condition for 4 hours.

(2) Soldering Iron

Lead terminal is directly contacted with the tip of soldering iron of $+280 \pm 5^\circ\text{C}$ for 3.0 seconds ± 0.5 seconds, and then being placed in natural condition for 4 hour.

2. Wash

The component cannot be withstand washing.

Ceramic Filters (CERAFIL[®]) for AM Receivers

Chip Type SFPCA Series

SFPCA series for AM use is one of the most recommendable intermediate filters, having such distinctive features as high selectivity, high stability and adjustment-free operation. Additionally its easy matching with IC helps create an easy circuit design.

■ Features

- 1. The filters are mountable by automatic placers and can be reflow soldered and withstanding washing.
- 2. The filters are wide bandwidth and high selectivity. So they are suitable for car radio and multi band radio.

Part Number	Center Frequency (fo) (kHz)	6dB Bandwidth (kHz)	Selectivity (+) (dB)	Selectivity (-) (dB)	Insertion Loss (dB)	Elements
SFPCA450KH1A-R1	450 ±1.0kHz	fn±3.0 min.	40 min.[fn+9kHz]	40 min.[fn-9kHz]	6 max.	4
SFPCA450KG1A-R1	450 ±1.0kHz	fn±4.5 min.	40 min.[fn+10kHz]	40 min.[fn-10kHz]	6 max.	4
SFPCA450KF4A-R1	450 ±1.5kHz	fn±6.0 min.	40 min.[fn+12.5kHz]	40 min.[fn-12.5kHz]	6 max.	4

Center frequency(fo) is defined by the center of 6dB bandwidth.
(fn) means nominal center frequency.
For safety purposes, connect the output of filters to the IF amplifier through a D.C. blocking capacitor. Avoid applying a direct current to the output of ceramic filters.
The order quantity should be an integral multiple of the "Minimum Quantity" shown in the package page.

■ Standard Land Pattern Dimensions

■ Notice (Soldering and Mounting)

1. Standard Reflow Soldering Condition

(1) Reflow

Filter is soldered one time within the following temperature condition and then being placed in natural condition for 24 hours.

(2) Soldering Iron

Electrode is directly with the tip of soldering iron of $+350 \pm 5^\circ\text{C}$ for 3 ± 1 seconds, and then being placed in natural condition for 24hours.

2. Wash

(1) Cleaning Solvent

CFC alternatives(HCFC Series), Isopropyl Alcohol(IPA), Water(Demineralized Water), Cleaning Water Solution(Cleanthrough-750H, Pine Alha 100S), Silicon(Technocare FRW)

(2) Cleaning Conditions

- Immersion Wash
2 minutes max. in above solvent at $+60^\circ\text{C}$ max.
- Shower or Rinse Wash
2 minutes max. in above solvent at $+60^\circ\text{C}$ max.

(3) Notice

- When components are immersed in solvent, be sure to maintain the temperature of components below the temperature of solvent.
- Please do not use ultrasonic cleaning.
- Total washing time should be within 4minutes.
- Please ensure the component is thoroughly evaluated in your application circuit.
- Please do not use chlorine, petroleum and alkali cleaning solvent.
- If you plan to use any other type of solvents, please consult with Murata or MURata representative prior to using.

■ Recommended IFT

Item \ Type	SFPCA		
	(1)―(2)	(2)―(3)	(4)―(6)
Winding Specification			
S(3) (2) (1)  (Bottom view)	60T	125T	28T
No load Qu	40		
Tuning Capacitance	180pF		

• Matching of CERAFIL®SFPCA series with IFT is decided by the Qu of IFT and IFT secondary side impedance, [Z2]. Set the QU at about 40 because a Qu value which is too high (e.g.,90) may produce ripple in the waveform. It is recommended to match the impedance of [Z2] with that of the CERAFIL®.

■ Test Circuit

SFULA/SFZLA Series

SFULA/SFZLA series for AM use is one of the most recommendable intermediate filters, having such distinctive features as high selectivity, high stability, and adjustment-free operation. Additionally its easy matching with IC helps create an easy circuit design.

■ Features

1. Center frequency range between 450 to 470 kHz are available standard tolerance of ± 2 kHz.
2. For frequency synthesizers, center frequencies of 450, 459 and 468 kHz are available standard tolerance of ± 1 kHz.

AM CERAFIL® Notice (Handling)

■ Chip Type PFWCC Series

1. The component may be damaged if excess mechanical stress is applied to it mounted on the printed circuit board.
2. Design layout of components on the PC board to minimize the stress imposed on the warp or flexure of the board.
3. After installing chips, if solder is excessively applied to the circuit board, mechanical stress will cause destruction resistance characteristics to lower. To prevent this, be extremely careful in determining shape and dimension before designing the circuit board diagram.

■ Chip Type SFPCA Series

1. The component will be damaged when an excessive stress is applied.
2. Use coupling capacitors to prevent applying D.C. voltage between input-ground, output-ground of "CERAFIL" as D.C. current may harm the component.
3. In the case that the component is cleaned, confirm no reliability degradation is created.
4. In case of covering filter with over coat, conditions such as material of resin, cure temperature, and so on should be evaluated well.

5. Do not use strong acidity flux, more than 0.2wt% chlorine content, in re-flow soldering.
6. The product, packed in the moisture-proof bag (dry pack), is sensitive to moisture. The following treatment is required before applying re-flow soldering, to avoid package cracks or reliability degradation caused by thermal stress. When unpacked, store the component in an atmosphere of below 25 C. and below 65% R.H., and solder within 48 hours.

■ Lead Type

1. Do not use this product with bend. The component may be damaged if excess mechanical stress is applied to it mounted on the printed circuit board.
2. The component will be damaged when an excessive stress is applied.
3. All kinds of re-flow soldering must not be applied on the component.
4. Do not clean or wash the component as it is not hermetically sealed.
5. Do not use strong acidity flux, more than 0.2wt% chlorine content, in flow soldering.

6. In case of covering filter with over coat, conditions such as material of resin, cure temperature, and so on should be evaluated well.
7. Accurate test circuit values are required to measure electrical characteristics. It may be a cause of mis-correlation if there is any deviation, especially stray capacitance, from the test circuit in the specification.
8. Use coupling capacitors to prevent applying D.C. voltage between input-ground, output-ground of "CERAFIL" as D.C. current may harm the component.

Ceramic Filters (CERAFIL®) for AM Receivers

CERAFIL® for Search-stop Signal Detection

BFULA series are narrow bandwidth filters. This filter is used in the application which detects the carrier peak with a narrow bandwidth amplifier ; electronic tuner as a stop signal detector.

- Features
- Most suitable for IC Station Detectors (SD).

Part Number	Resonant Frequency (Fr) (kHz)	Delta F (Fa-Fr) (kHz)	Resonant Resistance (ohm)	Capacitance (pF)
BFULA450KC-B0	450 ±1.0kHz	within 14.0 ±2.0kHz	20 max.	360 ±20%
BFULA450KC004-B0	450 ±0.8kHz	within 9.0 ±2.0kHz	30 max.	360 ±20%
BFULA450KK003-B0	450 ±1.0kHz	within 27.5 ±4.5kHz	30 max.	550 ±20%

fa-fr means difference between the anti-resonant frequency and the resonant frequency.

■ Impedance Characteristics

Length from hole center to component center	P2	6.35	±0.5	
Lead spacing (1)	F	5.0	+0.5 -0.2	
Lead spacing (2)	F1	2.5	±0.2	
Slant to the forward or backward	Δh	0	±1.0	
Slant to the left or right	ΔS1	0	±1.0	
Width of carrier tape	W	18.0	±0.5	
Width of hold down tape	W0	6.0 min.		
Position of sprocket hole	W1	9.0	±0.5	
Gap of hold down tape and carrier tape	W2	0	+0.5 -0	Hold-down tape doesn't exceed the carrier tape.
Distance between the center of sprocket hole and lead stopper	H0	18.0	±0.5	
Diameter of sprocket hole	D0	ø4.0	±0.2	
Total tape thickness	t	0.6	±0.2	
Pitch of sprocket hole (2)	P020	254.0	±1.5	The pitch of 20 sprocket holes

(in mm)

⚠ Note:

1. Export Control

〈For customers outside Japan〉

Murata products should not be used or sold for use in the development, production, stockpiling or utilization of any conventional weapons or mass-destructive weapons (nuclear weapons, chemical or biological weapons, or missiles), or any other weapons.

〈For customers in Japan〉

For products which are controlled items subject to the "Foreign Exchange and Foreign Trade Law" of Japan, the export license specified by the law is required for export.

2. Please contact our sales representatives or product engineers before using our products listed in this catalog for the applications listed below which require especially high reliability for the prevention of defects which might directly cause damage to the third party's life, body or property, or when intending to use one of our products for other applications than specified in this catalog.

- ① Aircraft equipment
- ② Aerospace equipment
- ③ Undersea equipment
- ④ Power plant equipment
- ⑤ Medical equipment
- ⑥ Transportation equipment (vehicles, trains, ships, etc.)
- ⑦ Traffic signal equipment
- ⑧ Disaster prevention / crime prevention equipment
- ⑨ Data-processing equipment
- ⑩ Application of similar complexity and/or reliability requirements to the applications listed in the above

3. Product specifications in this catalog are as of July 2001. They are subject to change or our products in it may be discontinued without advance notice. Please check with our sales representatives or product engineers before your ordering. If there are any questions, please contact our sales representatives or product engineers.

4. Please read CAUTION and Notice in this catalog for safety. This catalog has only typical specifications. Therefore you are requested to approve our product specification or to transact the approval sheet for product specification, before your ordering.

5. Please note that unless otherwise specified, we shall assume no responsibility whatsoever for any conflict or dispute that may occur in connection with the effect of our and/or third party's intellectual property rights and other related rights in consideration of your using our products and/or information described or contained in our catalogs. In this connection, no representation shall be made to the effect that any third parties are authorized to use the rights mentioned above under licenses without our consent.

6. None of ozone depleting substances (ODS) under the Montreal Protocol is used in manufacturing process of us.
