

SAW Components

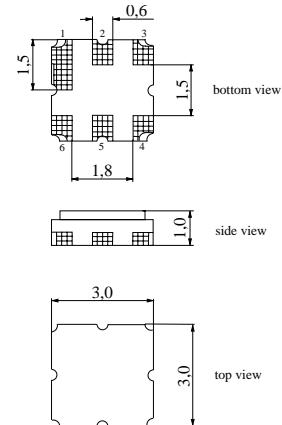

Data Sheet B3740

Data Sheet

Features

- RF low-loss filter for remote control receivers
- Package for **Surface Mounted Technology (SMT)**
- Balanced and unbalanced operation possible
- Passivation layer: Elpas
- Compliant to EU RoHS Directive (2002/95/EC)
- Lead free soldering compatible with J - STD20C

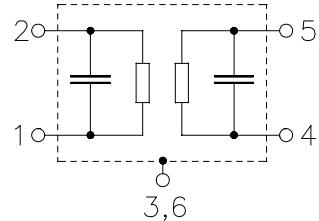

Ceramic package DCC6E

Terminals

- Ni, gold plated

typ. dimensions in mm, approx. weight 0,037 g

Pin configuration¹⁾

1	Input (recommended) or Input Ground
2	Input Ground (recommended) or Input
4	Output (recommended) or Output Ground
5	Output Ground (recommended) or Output
3,6	to be grounded

Type	Ordering code	Marking and package according to	Packing according to
B3740	B39431-B3740-H110	C61157-A7-A143	F61074-V8168-Z000

Electrostatic Sensitive Device (ESD)
Maximum ratings

Operable temperature range	T_A	-45/+120	°C	
Storage temperature range	T_{stg}	-45/+120	°C	
DC voltage	V_{DC}	6	V	
Source power	P_S	10	dBm	source impedance 50 Ω

¹⁾ The recommended pin configuration usually offers best suppression of electrical crosstalk. The filter characteristics refer to this configuration.

**SAW Components****B3740****Low-loss Filter****433,92 MHz****Data Sheet****Characteristics**

Reference temperature:

 $T_A = -45 \dots +95^\circ\text{C}$

Terminating source impedance:

 $Z_S = 50 \Omega$ and matching network

Terminating load impedance:

 $Z_L = 50 \Omega$ and matching network

		min.	typ.	max.	
Center frequency (center frequency between 3 dB points)	f_C	—	433,92	—	MHz
Minimum insertion attenuation including loss in matching elements ($Q_L = 47$)	α_{\min}	—	2,5	3,5	dB
Pass band (relative to α_{\min}) 433,74 ... 434,10 MHz		—	0,8	3,0	dB
Relative attenuation (relative to α_{\min})	α_{rel}				
10,00 ... 414,00 MHz	50	58	—	—	dB
414,00 ... 423,50 MHz	45	53	—	—	dB
423,50 ... 431,52 MHz	35	40	—	—	dB
431,52 ... 432,90 MHz	20	24	—	—	dB
432,90 ... 433,10 MHz	15	24	—	—	dB
434,92 ... 444,00 MHz	15	19	—	—	dB
444,00 ... 810,00 MHz	42	50	—	—	dB
810,00 ... 1500,00 MHz	55	65	—	—	dB
1500,00 ... 2500,00 MHz	50	60	—	—	dB
Impedance for pass band matching ¹⁾ Input: $Z_{\text{IN}} = R_{\text{IN}} \parallel C_{\text{IN}}$ Output: $Z_{\text{OUT}} = R_{\text{OUT}} \parallel C_{\text{OUT}}$		—	390 \parallel 2,1	—	$\Omega \parallel \text{pF}$
		—	390 \parallel 2,1	—	$\Omega \parallel \text{pF}$

¹⁾ Impedance for passband matching bases on an ideal, perfect matching of the SAW filter to source- and to load impedance (here 50 Ohm). After the SAW filter is removed and input impedance into the input matching / output matching network is calculated.

The conjugate complex value of these characteristic impedances are the input and output impedances for flat passband. For more details, we refer to EPCOS application note #4.

Data Sheet

Matching network to 50 Ω (element values depend on pcb layout and equivalent circuit)

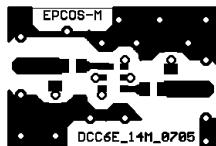

Minimising the crosstalk

For a good ultimate rejection a low crosstalk is necessary. Low crosstalk can be realised with a good RF layout. The major crosstalk mechanism is caused by the “ground-loop” problem.

Grounding loops are created if input-and output transducer GND are connected on the top-side of the PCB and fed to the system grounding plane by a common via hole. To avoid the common ground path, the ground pin of the input- and output transducer are fed to the system ground plane (bottom PCB plane) by their own via hole. The transducers' grounding pins should be isolated from the upper grounding plane.

A common GND inductivity of 0.5nH degrades the ultimate rejection (crosstalk) by 20dB.

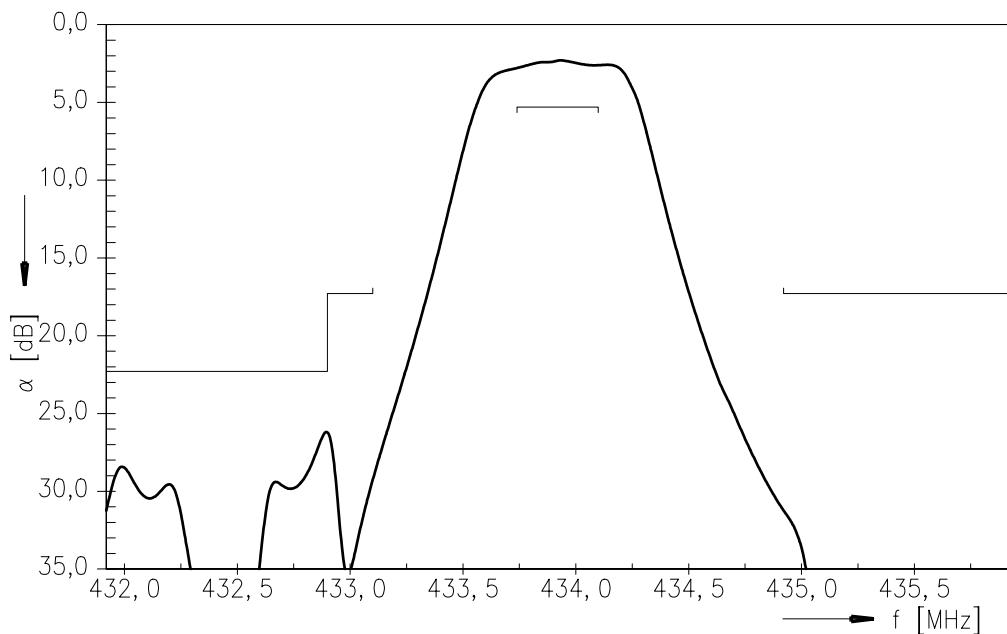

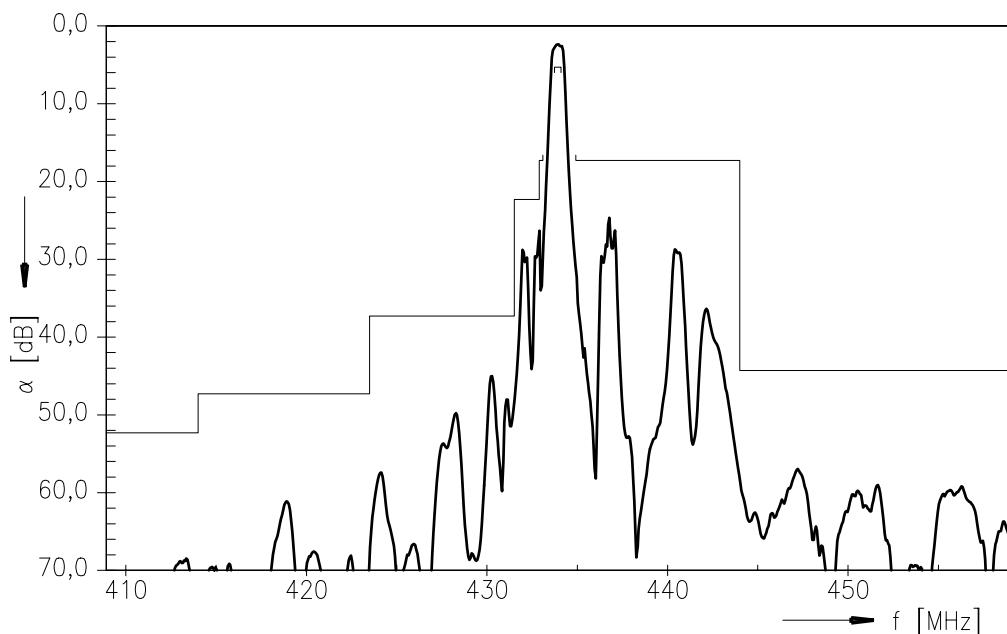

The optimised PCB layout, including matching network for transformation to 50 Ohm, is shown here. In this PCB layout the grounding loops are minimised to realise good ultimate rejection.

Optimised PCB layout for SAW filters in DCC6E package, pinning 1,4 (top side, scale 1:1)

The bottom side is a copper plane (system ground area). The input and output grounding pins are isolated and connected to the common ground by separated via holes.

For good contact of the upper grounding area with the lower side it is necessary to place enough via holes.
