

PCI-300

Option F

Featuring:

- Quad output
- Floating wide-range fourth output
- Flexible ratings
- Universal AC input
- 0.99 typical power factor
- Remote sense main
- AC power fail
- Available with or without fan
- Safety agency approved

STANDARD PCI SERIES

MODEL	PWR	OUTPUT #1	OUTPUT #2	OUTPUT #3	OUTPUT #4
PCI 304-1203	300	+5 @ 30A	+12 @ 8.0A	-12 @ 4.0A	+3.3 @ 15.0A

The PCI-304 power supply series offers a combination of outputs designed for systems that require both high-current 5V and 3.3V outputs. Outputs #2 and #3 provide ± 12 volts up to 8 amps.

The series is extremely flexible, and it can be cooled using system airflow or by an integral ball-bearing fan (F option).

The fourth output is fully isolated and is easily configured to your system requirements.

SPECIFICATIONS:

INPUT

AC Input: 90 - 264 Vac continuous range, 47 to 63 Hz. Internally fused for 7 A.

Power Factor: 0.99 typical at full load. Meets EN61000-3-2.

Inrush: Cold start AC current limited to 20 A. at 115 Vac, 40 A. at 230 Vac. Limited by thermistor.

Brownout Protection: Holds regulation to 85 Vac.

Holdup Time: 20 ms minimum.

Efficiency: 70% typical at full load nominal line.

AC Power Fail: Provides TTL "0" 5 ms before output goes out of regulation band upon loss of input power.

OUTPUT

Adjustability: $\pm 5\%$

Line & Load Reg: $\pm 1\%$ over AC input range and minimum to maximum load, V1, V2, & V3. V4: $\pm 2\%$

Minimum Load: 10% on main to insure regulation of aux outputs.

Ripple & Noise: Less than 1% p-p or 100 mV, whichever ever greater.

Remote Sense: (Outputs V1, and V4) Compensates for 500 mv total line drop. Open sense lead protection.

Temperature Coefficient: 0.02% per degree C.

Transient Response: Output voltage returns to within 1% in less than 500 μ s for a 50 % load change. Peak transient does not exceed 5%.

Overload Protection: All outputs are protected against overload and short circuit.

Automatic recovery upon removal of fault.

Overvoltage Protection: Outputs V1, V2 & V3 protected against power supply induced over voltage condition. Factory set to 125% maximum.

Reverse Voltage: Protected against reversed voltage up to supply current ratings.

ENVIRONMENTAL

Thermal Protection: Shuts down power supply if overheated. Requires AC input to be recycled to reset.

Temperature Range: 0° C to 50° C. at full ratings.

Safety Agencies: Approved to UL 1950; CSA 22.2 # 234 (950); TUV EN60950, Class 1 SELV; CE 72/23/EEC/93/68EEC (low voltage directive).

Conducted RFI: Meets FCC part 15, Subpart J class A, and CISPR 22 class A.

Output Isolation: Isolated from ground 50Vdc.

Cooling: 30CFM required to achieve full ratings.

Cooling: Self-cooled by ball-bearing fan (F-option).

OPTIONS:

Option F: Integral ball-bearing fan

Consult factory for other available options.
