

Low Current SMD LED

Description

These new devices have been designed to meet the increasing demand for low current SMD LEDs.

The package of the TLMC310. is the PLCC-2 (equivalent to a size B tantalum capacitor).

It consists of a lead frame which is embedded in a white thermoplast. The reflector inside this package is filled up with clear epoxy.

94 8553

Features

- SMD LED with exceptional brightness
- Compatible with automatic placement equipment
- EIA and ICE standard package
- Compatible with infrared, vapor phase and wave solder processes according to CECC
- Available in 8 mm tape
- Low profile package
- Non-diffused lens: excellent for coupling to light pipes and backlighting
- Very low power consumption
- Luminous intensity ratio in one packaging unit
 $I_{Vmax}/I_{Vmin} \leq 2.0$
- Lead-free device

Applications

Automotive: Backlighting in dashboards and switches

Telecommunication: Indicator and backlighting in telephone and fax

Indicator and backlight for audio and video equipment

Indicator and backlight for battery driven equipment

Small indicator for outdoor applications

Indicator and backlight in office equipment

Flat backlight for LCDs, switches and symbols

General use

Parts Table

Part	Color, Luminous Intensity	Angle of Half Intensity ($\pm\phi$)	Technology
TLMC3100	Green, $I_V > 0.63$ mcd	60 °	GaP on GaP
TLMC3101	Green, $I_V > 1$ mcd	60 °	GaP on GaP

Absolute Maximum Ratings

$T_{amb} = 25\text{ °C}$, unless otherwise specified

TLMC310.

Parameter	Test condition	Symbol	Value	Unit
Reverse voltage		V_R	6	V
DC Forward current		I_F	7	mA
Surge forward current	$t_p \leq 10\text{ }\mu\text{s}$	I_{FSM}	0.5	A
Power dissipation	$T_{amb} \leq 90\text{ °C}$	P_V	20	mW
Junction temperature		T_j	100	°C
Operating temperature range		T_{amb}	- 40 to + 100	°C

Parameter	Test condition	Symbol	Value	Unit
Storage temperature range		T_{stg}	- 55 to + 100	°C
Soldering temperature	$t \leq 5$ s	T_{sd}	260	°C
Thermal resistance junction/ambient	mounted on PC board (pad size > 16 mm ²)	R_{thJA}	500	K/W

Optical and Electrical Characteristics

$T_{amb} = 25$ °C, unless otherwise specified

Green

TLMC310.

Parameter	Test condition	Part	Symbol	Min	Typ.	Max	Unit
Luminous intensity ²⁾	$I_F = 2$ mA	TLMC3100	I_V	0.63	1.6		mcd
		TLMC3101	I_V	1.0	1.6		mcd
Dominant wavelength	$I_F = 2$ mA		λ_d	563		575	nm
Peak wavelength	$I_F = 2$ mA		λ_p		565		nm
Angle of half intensity	$I_F = 2$ mA		ϕ		± 60		deg
Forward voltage	$I_F = 2$ mA		V_F		1.9	2.4	V
Reverse voltage	$I_R = 10$ μ A		V_R	6	15		V
Junction capacitance	$V_R = 0$, $f = 1$ MHz		C_j		50		pF

²⁾ in one Packing Unit $I_{Vmax}/I_{Vmin} \leq 2.0$

Ozone Depleting Substances Policy Statement

It is the policy of **Vishay Semiconductor GmbH** to

1. Meet all present and future national and international statutory requirements.
2. Regularly and continuously improve the performance of our products, processes, distribution and operating systems with respect to their impact on the health and safety of our employees and the public, as well as their impact on the environment.

It is particular concern to control or eliminate releases of those substances into the atmosphere which are known as ozone depleting substances (ODSs).

The Montreal Protocol (1987) and its London Amendments (1990) intend to severely restrict the use of ODSs and forbid their use within the next ten years. Various national and international initiatives are pressing for an earlier ban on these substances.

Vishay Semiconductor GmbH has been able to use its policy of continuous improvements to eliminate the use of ODSs listed in the following documents.

1. Annex A, B and list of transitional substances of the Montreal Protocol and the London Amendments respectively
2. Class I and II ozone depleting substances in the Clean Air Act Amendments of 1990 by the Environmental Protection Agency (EPA) in the USA
3. Council Decision 88/540/EEC and 91/690/EEC Annex A, B and C (transitional substances) respectively.

Vishay Semiconductor GmbH can certify that our semiconductors are not manufactured with ozone depleting substances and do not contain such substances.

We reserve the right to make changes to improve technical design and may do so without further notice.

Parameters can vary in different applications. All operating parameters must be validated for each customer application by the customer. Should the buyer use Vishay Semiconductors products for any unintended or unauthorized application, the buyer shall indemnify Vishay Semiconductors against all claims, costs, damages, and expenses, arising out of, directly or indirectly, any claim of personal damage, injury or death associated with such unintended or unauthorized use.
