

Characteristics

(Applicable standards : JIS C 5223, EIAJ RC-2134)

ROHM was the first company in the world to offer rectangular chip resistors.

Today it has 7 series of reliable resistors ranging from the MCR100 (6.3mm × 3.2mm) down to the newest generation

MCR01 (1.0mm × 0.5mm). ROHM resistors are ISO-9001 approved.

The design and specifications are subject to change without prior notice. Before ordering or use, please check the technical specification sheet.

Notes : 1. Jumper chips of the same shape are available (50mΩ Max.)

2. Figures in () show the size in inches.

3. FX (except MCR 03) and JW : USA only. For other markets, the TCR of ±100ppm/°C(X) with F and of ±200ppm/°C(X) with J are guaranteed relative to the same resistance range.

4. *1: The rated voltage is the result of rated voltage (V) = $\sqrt{\text{rated power (W)} \times \text{nominal resistance (Ω)}}$ or the maximum operating voltage, whichever is smaller.

*2: In the short-time overloading test (JIS C 5202 5.5) , and intermittent overloading test (JIS C 5202 5.8) , the load voltage used is a particular voltage (2.5 times the rated voltage) or the maximum overload voltage.

*3: Included in the protective mask material category. Be sure of the type before ordering.
