

Safety Limit Switch D4B-□N

Snap-action contact with approved direct opening operation certification .

Maintenance, seal, and resistance to shock increased and direct opening mechanism added.

Three-conduit switches and 2NC switches are also available.

- Direct opening mechanism (NC contacts only) added to enable opening contacts when faults occur, such as fused contacts.
- Wide standard operating temperature range: -40°C to 80°C (standard type).
- Safety of lever settings ensured using a mechanism that engages a gear between the operating position indicator plate and the lever.
- Equipped with a mechanism that indicates the applicable operating zone, as well as push-button switching to control left and right motion.
- Approved standards: UL, CSA, EN (TÜV), SUVA, BIA, and CCC.
- Head seal structure strengthened to improve seal properties (TÜV: IEC IP67, UL: NEMA 3, 4, 4X, 6P, and 13).
- Models with gold-plated contacts added to the series to enable handling microloads.

Note: Contact your sales representative for details on models with safety standard certification.

■ Ordering Switches

Because the D4B-□N employs a block mounting construction, parts may be ordered as a complete assembled set or individually as replacement parts. Switches ordered as sets are assembled before shipping.

Note: Do not order combinations of only a Side Rotary Lever and Head or a Side Rotary Lever and Switch Box.
