

Remote air flow rate monitoring and system automation control can now be achieved through the use of 4-20 mA output signals. Our 4-20 mA analog outputs are proportional to system flow rates and can be used with PLC controlled operations to monitor system performance. Those same outputs provide digital displays for direct readings in SCFM when paired with our LCD Digital Readout option. Combined with our Variable Frequency Drives, you can now achieve a completely automated system capable of adjusting blower performance to meet changing system demands. Maintaining your system at peak performance gives your company the competitive edge needed in today's marketplace.

DIFFERENTIAL PRESSURE TRANSMITTER

- 4-20 mA signal output control signals provide flow rate monitoring capabilities from remote locations
- NEMA 1R—raintight enclosure protects the integrated DC power supply and rugged differential pressure transducer
- Suitable for remote mounting up to 10' from flow meter

- Weight: 3 oz.
- Signal output: 4-20 mA, DC¹
- Hi/Lo pressure fittings feature snap lock action to insure trouble-free connections²
- System includes standard flow meter for on-site readings and troubleshooting
- Operating temperature: 0°F to 150°F
- Drawing available

LCD DIGITAL READOUT OPTION

- Factory configured to display direct readings in SCFM to a remote location up to 50' from signal output¹
- NEMA 4,IP65 enclosure ready for panel mount installation power supply and rugged differential pressure transducer
- Suitable for remote mounting up to 10' from flow meter installation
- Power input: 120 VAC, 50/60 Hz AC, Field configurable to 240VAC
- Display: 5 digit, 7 segment, .5" high LED w/3.3 Hz update rate
- Operating temperature: 10°C to 40°C
- Weight: 1 lb., 14 oz.
- Drawing available

Note 1: 4-20mA output control wiring to be customer supplied. Shielded, 2 conductor cables, 22AWG is recommended for runs up to 100'. For longer runs contact factory.

Note 2: Use 5/16" OD stiff wall tubing — connect "Lo" on flowmeter to "Lo" on 4-20 mA enclosure, "Hi" on flowmeter to "Hi" on 4-20 mA enclosure. Tubing must be equal in length (maximum length is 10 feet).
