

2 and 3 Channel BaseTrak®

HUBBELL

PolyTrak® Non-Metallic Raceway Systems

Extensive Box Offering:

**2 Channel BaseTrak
2-Gang Flush**

**3 Channel BaseTrak Full
Capacity Boxes 1-, 2- and 3-Gang**

**3 Channel BaseTrak Flush Boxes
1-Gang 2-Gang**

Features:

- Large capacity 2 and 3 channel raceway.
- Snap-on 2 gang flush box.
- New split-cover option.
- Universal 2 and 3 channel fitting design.
- 1 1/4" bend radius fittings for cat. 5, 5e and 6 communication cabling including fiber optics.
- Non-metallic.
- Office white color.

Benefits:

- Maximum capacity for both power and data.
- Easy to install while allowing a neat attractive appearance.
- Allows data or power only accessibility.
- Gives installer and end-user ability to use either 2 channel or 3 channel BaseTrak systems.
- Ensures T-568 compliant bend radius for data cabling. Eliminates miter cutting raceway to covers.
- Impact resistant; non-conductive easy to install.
- Aesthetically pleasing design blends in with any environment.

+ Total power wiring must not exceed number specified in A+B.

** Maximum power capacity in single channel ONLY.

*** Total power wiring capacity can not exceed number specified in A+B+C. NOTE: 40% capacity is the initial maximum recommended by EIA/TIA-569-A for designing communication cabling systems. 60% fill allowed for additions and approaches maximum fill. All communication wiring capacities should be derated proportionally to the amount the installed connectors restrict the cross-sectional area of the raceway. This is not required when Hubbell's full capacity inline boxes are used.

NOTE: 1. 40% capacity is the maximum recommended by EIA/TIA-569-A for designing new communication cabling systems. 60% allowed for additions and approaches maximum fill.

2. Power wire fill is based on NEC requirements for allowed heat rise.
