Cable Reels

Safety Cut-Out

In the event of an overload, the cut-out will trip and terminate power to the connected appliances.

Simply disconnect all appliances, press the reset button and reconnect the appliances ensuring you have calculated the maximum power input/wattage correctly.

Don't forget, THE RATING OF THE CABLE REEL IS SIGNIFICANTLY REDUCED WHEN FULLY WOUND

The JOJO range includes a cable reel for every application: cassette type reels for around the home; larger semi-closed reels to help keep the cable tidy; traditional open reels are simple and functional.

JOJO cable reels are manufactured to the highest quality standards. All 240V reels carry the prestigious and easily recognised BSI Kitemark.

JOJO have pioneered the introduction of safety cut-outs on all cable reels in accordance with BS EN 61242.

Smart designs and innovative packaging make JOJO cable reels the first choice:-

Shelf Merchandiser Boxes

All our most popular cable reels are available in merchandisers of 5-8 reels. Designed for Point of sale and yet tough enough for transportation.

Caddies

The JOJO caddy helps to display the reel in-store and also doubles up as a storage solution. On the reverse is a simple product selector which enables the customer to choose the right reel for the application.

Extension Leads

Surge & Spike

Protect your Hi-Fi, TV and Computer equipment from power surges and spikes.

Surge and Spike extension leads protect your appliances by absorbing/smoothing any variations in power supply.

RFI Filtering

Look out for trailing leads with protection against Radio Frequency Interference.

Each year we introduce more and more appliances into our homes. Sometimes there are simply too few sockets or they are positioned in the wrong location for the appliance.

JOJO offer a comprehensive range of extension leads, from a single socket of 5 metres, up to our latest 8 socket 2 metre lead incorporating current overload protection, switch and power indicator, all manufactured to the highest standards and including many innovative features.

Outdoor Accessories

OUTDOOR SOCKET & SWITCHES

The use of electrical products outdoors, both for gardening and now increasingly, leisure applications, has created a new market for specialised outdoor wiring accessories.

Weatherproof to IP56, the range is suitable for permanent installations such as lighting, pond pumps and fountains as well as providing power for a host of familiar outdoor accessories such as mowers, trimmers, hedge trimmers and power washers.

Outdoor accessories

- Ideal for DIY installation, full instructions included
- Packed in hanging clam packs

Smoke Alarms

SMOKE ALARMS

A range of 3 ionisation-type smoke alarms for domestic use, battery operated and easy to install.

- The 'Solo' operates as a single unit, independent of any other detection device.
- The 'Pause' features an additional function whereby an alarm condition can be paused for 10 minutes, making this model particularly suited to kitchen installation.
- The 'System' model provides maximum 'peace of mind' by allowing additional units (up to a maximum of 20) to be connected to each other. If one model alarms, the connected units are activated.

Each unit is supplied with a long-life battery and fixing bracket to ensure quick and easy removal of the unit for cleaning or battery change.
