

AN5601K

Color Signal, Video Signal and Synchronous Signal Processing IC for PAL/NTSC TV

Overview

The AN5601K is a single chip integrated circuit in which color signal processing, video signal processing and synchronous signal processing circuits for PAL/NTSC color TV are integrated.

Features

- PAL/NTSC signal processing
- External RGB signal input pin provided
- Compatible with the world set in combination with SECAM signal processing IC (AN5633K).
- Vertical 50/60Hz switching
- Dual loop horizontal AFC
- Sand-castle pulse output pin provided.
