ADC1210S080F2

ADC1210S080F2 demoboard; LVDS/DDR
version;

IDTs ADC1210S080F2 demoboard is suitable for dynamic performance evaluations from low to high IF configuration with LVDS DDR output variants. A data-acquisition board can be used during design and prototype to analyze ADC performance.

Features

• LVDS/DDR outputs

• Single power supply (on-board regulators)

• SMA connector for clock and analog input signals
