

Low-Profile, Shielded Drum Core, Tapped Inductor

SDT30 Series

SMD Device

Description

- Halogen Free
- Approved for use with Maxim® MAX14521 chip set
- 125°C maximum total temperature operation
- 3.1 x 3.1 x 1.0mm shielded drum core
- Ferrite core material
- Low losses
- High efficiency
- Reduces peak output currents
- Magnetically shielded, low EMI
- RoHS compliant

Applications

- Keypads
- Instrument clusters
- EL backlighting
- Buck or boost inductor

Environmental Data

- Storage temperature range: -40°C to +125°C
- Operating temperature range: -40°C to +125°C (with derated current)
- Solder reflow temperature: J-STD-020D compliant

Packaging

- Supplied in tape-and-reel packaging, 5000 parts per reel, 13" diameter reel
- Also supplied in tape-and-reel packaging, 7" diameter reel. See product specifications table note 5 below.

Product Specifications

Part Number ⁵	Pin Numbers	OCL ¹ (μH)	Part Marking Designator	Turns Ratio Primary:Secondary	I _{rms} ² (Amps)	I _{sat} ³ (Amps) @25°C	DCR (mΩ) @20°C	K-factor ⁴
SDT30-127-R	(1 - 2) Primary	2.9 ± 30%	A	1:7	0.60	0.85	0.41 ± 15%	856.0
	(2 - 3) Secondary	148 ± 20%			0.13	0.12	9.0 ± 15%	N/A

1 Open Circuit Inductance (OCL) Test Parameters: 100kHz, 0.10V_{rms}, 0.0Adc

2 I_{rms}: DC current for an approximate temperature rise of 40°C without core loss when either the primary or secondary winding is running separately. Derating is necessary for AC currents. PCB pad layout, trace thickness and width, air-flow and proximity of other heat generating components will affect the temperature rise. It is recommended the part temperature not exceed 125°C under worst case operating conditions verified in the end application.

3 I_{sat}: Peak current for approximately 30% rolloff at +25°C of primary or secondary with another winding open.

4 K-factor: Used to determine B_{p-p} for core loss (see graph). B_{p-p} = K • L • ΔI. B_{p-p}: (Gauss), K: (K-factor from table), L: (primary inductance in μH), ΔI (peak-to-peak ripple current in amps).

5 Part Number Definition: SDT30-x2x-yy-R

- SDT30 = Product code and size
- -x2x = Turns ratio (first "x" = primary winding, "2" = ":" and second "x" = secondary winding) e.g., -127 = 1:7 primary to secondary turns ratio.
- -yy = add "T7" for 7 inch tape-and-reel package. Leave blank for 5000 parts on 13 inch tape-and-reel package.
- "-R" suffix = RoHS compliant

Dimensions - mm

Part Marking: Three digit marking; 1st digit indicated inductance value per Part Marking Designator chart, 2nd digit indicated bi-weekly production date code, 3rd digit is last digit of the year produced.

Packaging Information - mm

Supplied in tape-and-reel packaging, 5000 parts per reel, 13" diameter reel.
Also supplied in tape-and-reel packaging on 7" diameter reel (not shown above). See product specifications table note 5 on page 1 for ordering details.
