User's Guide

EVM IMPORTANT NOTICE (CATEGORY B)

IMPORTANT: TI is providing the enclosed **HPA013B/HPA020A** evaluation module under the following conditions:

This evaluation module (EVM) being provided by Texas Instruments (TI) is intended for use for **ENGINEERING DEVELOPMENT OR EVALUATION PURPOSES ONLY** and is not considered by Texas Instruments to be fit for commercial use. As such, this EVM may not be complete in terms of design and/or manufacturing related protective considerations including product safety measures typically found in the end-product incorporating the module. As a prototype, this product does not fall within the scope of the European Union Directive on electromagnetic compatibility and on low voltage and therefore may not meet the technical requirements of the directive. This EVM is not subject to the EU marking requirements.

- Should this EVM not meet the specifications indicated in the User's Guide the EVM may be returned within 30 days from the date of delivery for a full refund. **THE FOREGOING WARRANTY IS THE EXCLUSIVE WARRANTY MADE BY TI AND IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED, IMPLIED, OR STATUTORY, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.**
- The user assumes all responsibility and liability for proper and safe handling of the EVM. The user acknowledge that the use of the EVM could present serious hazards and that it is the user's responsibility to take all precautions for the handling and use of the EVMs in accordance with good laboratory practices. Please be aware that the products received may not be regulatory compliant or agency certified (FCC, UL, etc.). Due to the open construction of the product, it is the user's responsibility to take any and all appropriate precautions with regard to electrostatic discharge.
- **NEITHER PARTY WILL BE LIABLE TO THE OTHER FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES.**
- TI is currently dealing with various customers for products, and therefore our arrangement with the user **will not be exclusive.**
- TI assumes **no liability for applications assistance, customer product design, software performance, or infringement of patents or services described herein.**
- Please read the User's Guide and specifically the section in the User's Guide pertaining to warnings and restrictions prior to handling the product. This section contains important information regarding high temperature and voltages which TI recommends to be read before handling the EVMs. In case of any doubt regarding safety, please contact the TI application engineer.
- Persons handling the product should have electronics training and observe good laboratory practice standards.
- No license is granted under any patent right or other intellectual property right of TI covering or relating to any combination, machine, or process in which such TI products or services might be or are used.
- This Agreement is subject to the laws of the State of Texas, excluding the body of conflicts of laws and the United Nations Convention on the International Sale of Goods, and will be subject to the exclusive jurisdiction of the courts of the State of Texas.

DYNAMIC WARNINGS AND RESTRICTIONS

It is important to operate this EVM within the maximum input voltage ranges specified in section 6.

Exceeding the specified input range may cause unexpected operation and/or irreversible damage to the EVM. If there are questions concerning the input range, please contact a TI field representative prior to connecting the input power.

Applying loads outside of the specified output range may result in unintended operation and/or possible permanent damage to the EVM. Please consult the EVM User's Guide prior to connecting any load to the EVM output. If there is uncertainty as to the load specification, please contact a TI field representative.

During normal operation, some circuit components may have case temperatures greater than 50°C. The EVM is designed to operate properly with certain components above 50°C as long as the input and output ranges are maintained. These components include but are not limited to linear regulators, switching transistors, pass transistors, and current sense resistors. These types of devices can be identified using the EVM schematic located in the EVM User's Guide. When placing measurement probes near these devices during operation, please be aware that these devices may be very warm to the touch.

1 Introduction

The UCC28514 module is a 100-W offline ac-to-dc voltage converter with power factor correction (PFC). The prototype was designed to show how the UCC28514 could be configured to control a dc-regulated output offline with one control integrated circuit. The module was design to operate over a universal input range of 85 V to 265 V with a regulated 24-V, 100-W output.

To correctly operate this EVM a fan is required to keep the ambient temperature at or below 40°C. Not keeping the temperature at or below 40°C could damage the EVM.

2 Caution

High-voltage levels are present on the evaluation module whenever it is energized. Proper precautions must be taken when working with the module. The evaluation module has a large energy storage capacitor and must be completely discharged before the module can be handled. Serious injury can occur if proper safety precautions are not followed.

3 Schematic

The schematic is broken up into three sections to make it more legible for the user.

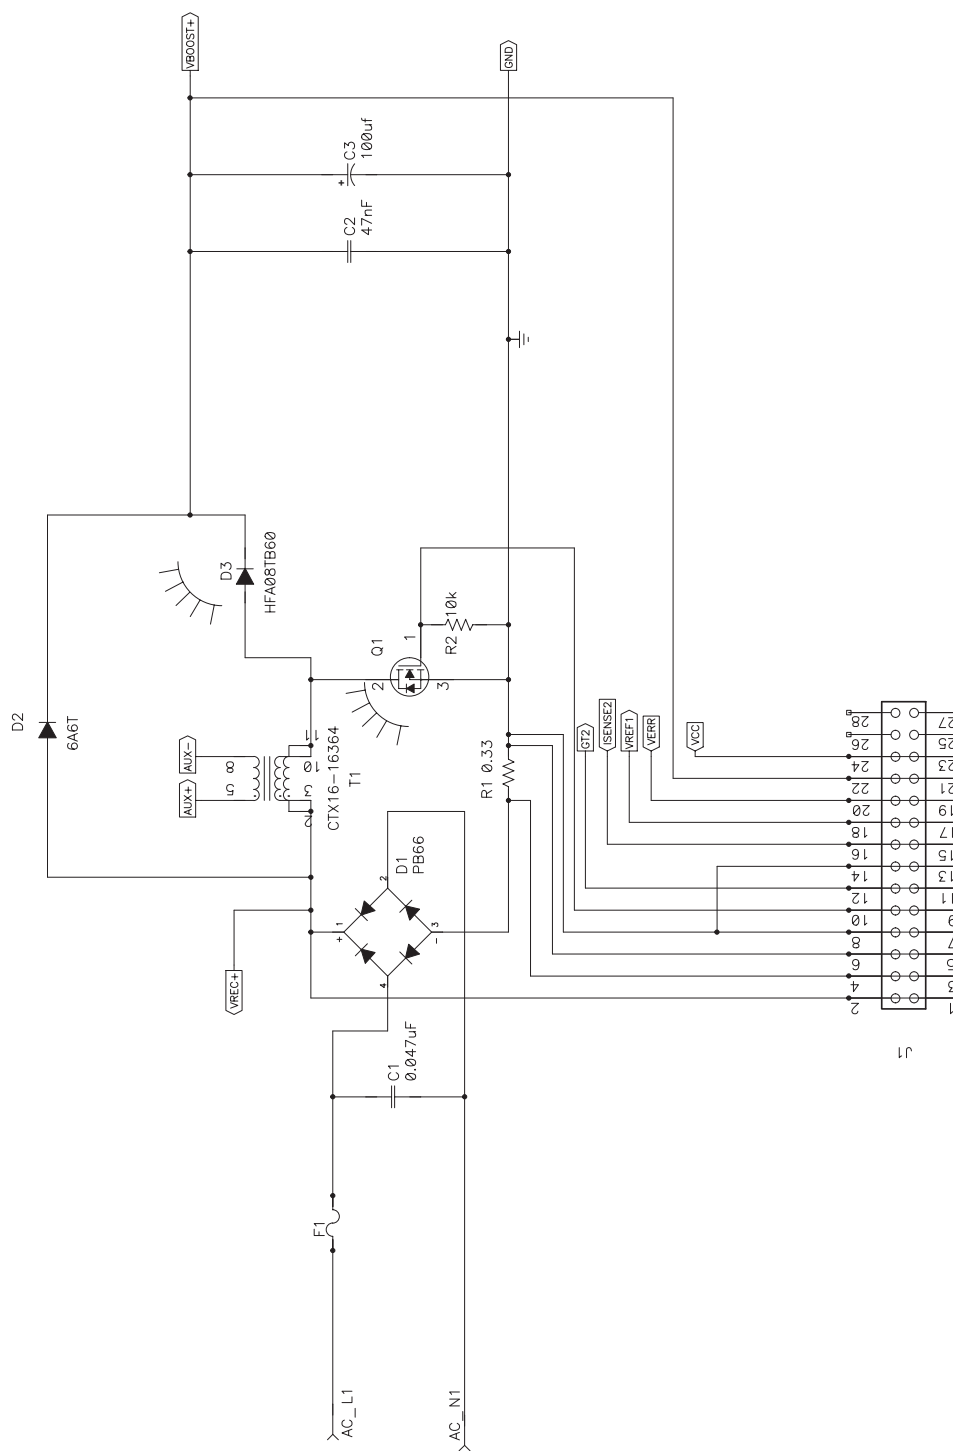

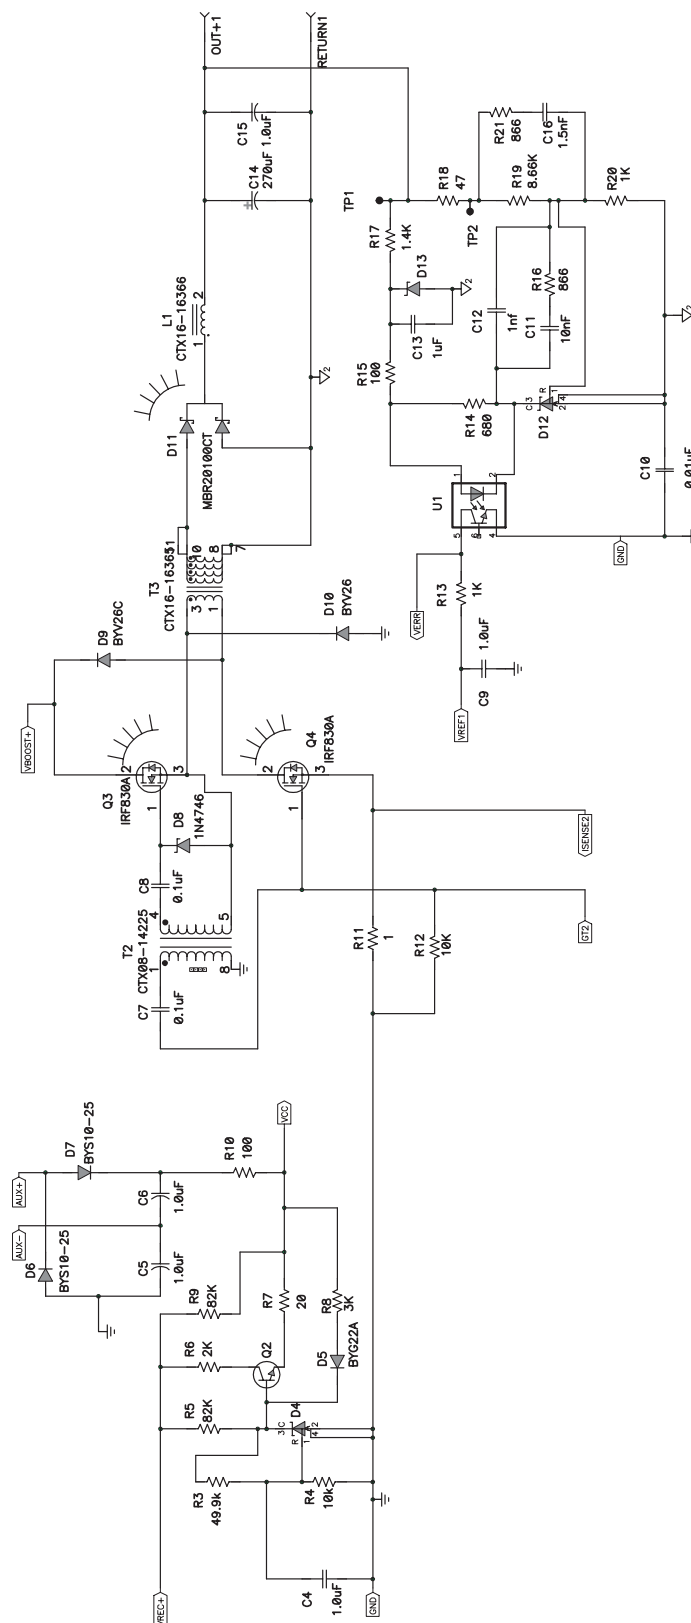

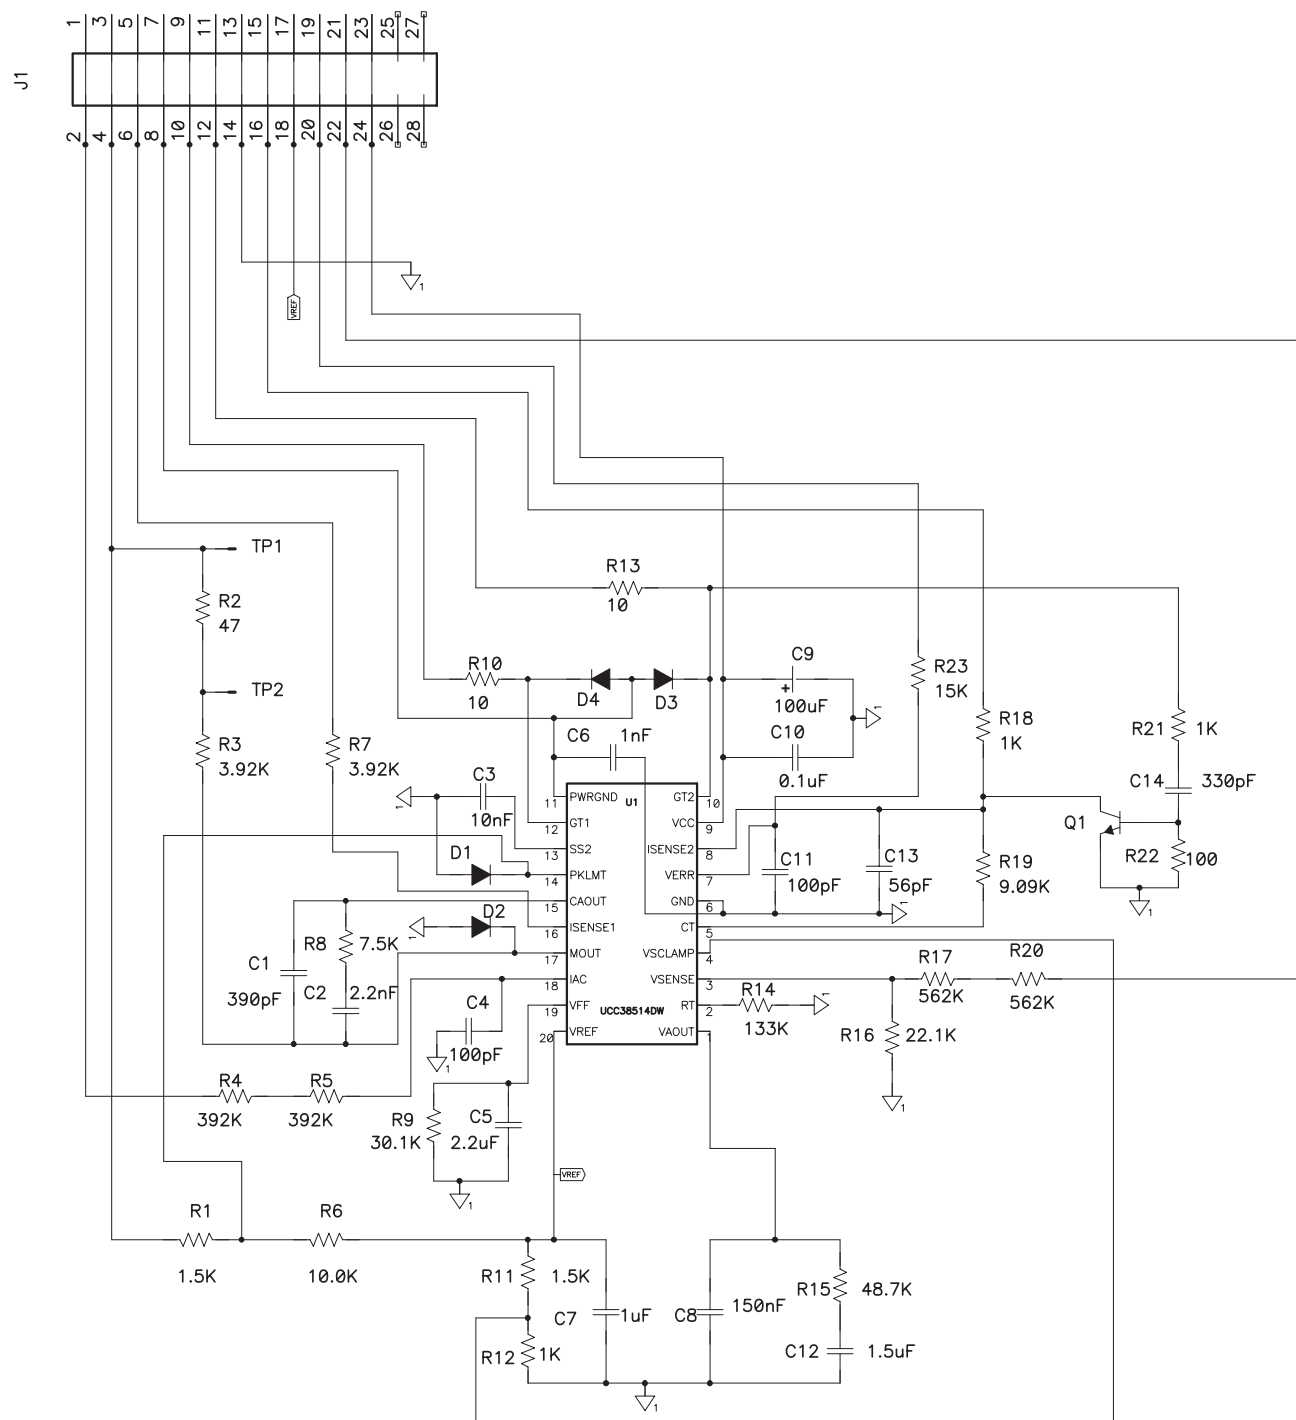

Figure 1. Mother Board HPA013

4 List of Materials

Table 1 lists the components used in this design. With minor component tweaks this design could be modified to meet a wide range of applications.

Table 1. Mother Board List of Materials

REFERENCE	QTY	DESCRIPTION	MANUFACTURER	PART NUMBER
AC_L1	0	Connector, binding post, insulated, for standard banana plug, black, 15 A, 141860	Johnson	111–0703–001
AC_N1	0	Connector, binding post, insulated, for standard banana plug, red, 15 A, 141860	Johnson	111–0702–001
C1	1	Capacitor, film, 0.047 μ F, 300 V _{AC} , $\pm 20\%$, 0.236 x 0.591	Panasonic	ECQU3A473MG
C2	1	Capacitor, polyester, .047 μ F, 630 V, 10%, 0.256 x 0.650	Panasonic	ECQ–E6473KZ
C3	1	Capacitor, electrolytic, 100 μ F, 450 V, TS series	Panasonic	ECO–S2WB101BA
C4, C9	2	Capacitor, ceramic, 1 μ F, 25 V, X7R, 10%, 1206	Panasonic	ECJ–3YB1E105K

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.
