

Ant™

Multifunction antenna

Ant is a multifunction antenna for vehicle roof mount. Ant is designed to meet a constant need for improved, reliable communication between vehicles and logistic security centres. Ant includes a mobile phone antenna, GPS antenna with LowNoise Amplifier and an option to mount an external radiator. A wide range of radiators for different frequencies are available.

Ant can be used in different applications depending on which system it is integrated with: Fleet Management, safety/security systems, logistics and other telematics applications. It's slim and aerodynamic design makes it perfect to use both on HGVs and smaller vehicles, like taxis, pick-ups, vans etc.

- **Multifunction antenna configured for four bands**
- **For both communication and GPS positioning systems**
- **Available for GSM 900/1800 and GPS, optional radiator of your own choice**
- **Available for AMPS/PCS 800/1900 and GPS**
- **GPS antenna with a matched Low Noise Amplifier**
- **Filter technique for GPS to prevent disturbances**
- **Slim and aerodynamic shape**
- **All versions RoHS compliant**
