CONNECTORS

The 4-pole loudspeaker cable connector from **HICON** is compatible with all common bayonet lock speaker connections. The robust, black polymer housing is scoop-proof according to IEC65/348 and inside offers 4 screw/clamping terminals for max. wire gauges of 4 mm² and max. cable

diameters of 13 mm. The innovative, positive-locking strain relief holds the cable firmly, yet gently in place. Another practical feature is the transparent ring for individual labels, which can be swapped fast and easily for a colour code ring.

Speaker connector, 4-pole.
