

Self Closing Cap

For RJ Field, USB and IEEE1394 receptacles

Description

This Self Closing Cap allows to protect automatically the RJ Field square flange receptacles (MIL-C-26482 type), protecting your system from dust and water projections. The same automatic cap can be used to protect USB and IEEE1394 receptacles.

A spring automatically closes the upper part of the cap when either the RJ Field plug, either the RJ45 cordset, either the USB or IEEE1394 cordset, either the USB key are removed from the receptacle.
