### Part Number : TPFLXIC010 - HexWax USB-I2C-SS

USB-I2C is a single chip USB to synchronous serial I2C slave interface. It greatly simplifies the connection of personal computer to a microcontroller capable of communication in I2C master mode. In addition to the standard 4 I2C control lines, 11 additional Virtual I/O lines have custom-defined functionality. USB-I2C uses the Human Interface Device (HID) USB profile. It does not require USB driver installation, and so is compatible iwth present and future Windows, Linux and Mac operating systems. For I2C master applications (to control I2C slave devices), expandIO-USB product is more suitable. USB-I2C-SS is the SSPO version suggested for production quantities.
