## Grab your gloves and start the fight

The latest release in the Robocraft Series, this easy to assemble R/C boxer is not only educational but also a lot of fun for kids and adults. The boxing fighter

features a twin motor gear box enabling this little boxer to punch while moving backwards, forwards or turning to the left or right. Hitting the face of an opposing fighter enough times will cause them to fall over. You can also adjust the level of each fighter, making it easier or harder for your fighter to be knocked down.

### About the Boxing Fighter

The boxing fighter features a twin motor gear box enabling this little boxer to punch while moving backwards, forwards or turning to the left or right. Through a simple adjustment the type of punch can be changed from an upper cut to a straight jab. Hitting the face of an opposing fighter enough times will cause them to fall over, making it loads of fun to fight your friend's robot. You can also adjust the level of each fighter, making it easier or harder for your fighter to be knocked down. Kit also comes with practice punch ball.

### Basic Specifications

- Total length: 141mm (arm extended), 87mm (arm retracted)
- Total width: 92mm
- Total height: 144mm
- Total weight: 160g (w/out remote control)
- Body material: ABS resin
- Gearbox, motor, remote-control also included.
- Motor and electronic circuit come pre-wired.
- Kit also comes with practice punch ball.
- A screwdriver for assembly is provided.
- Requires two R6/AA/UM3 batteries (sold separately).

### How to play

There are many ways to enjoy the remote-control boxing fighter. You can either build a course that the robot should follow in order to reach the target that has to be hit or create a ring with a board or a tile and defeat your opponent by punching them out of the ring. You can also make walls with various blocks and try to destroy it with the boxing fighter as fast as possible. See gallery picture for details.
