PV12PN

- Outlets align with rack units allows for optimization and standardization of equipment power cord lengths; reduces cord slack and congestion behind the equipment, which enhances thermal management
- Six 30A power outlet units can be mounted on one side of the Net-Access™ Cabinet providing 90 Amps redundant power in the space of 2 traditional 66" vertical power outlet units
- Monitor key power criteria via the network or local LED display on unit
- (2) 15 amp magnetic breakers to protect equipment and power infrastructure
- Tool-less mounting
- Slots adjacent to outlets accommodate Panduit's plug retention device (part number PRPC13-60 for black and -69 for ivory) to ensure a secure connection and provide outlet labeling location
