

VARISPEED E7Z IP54 INVERTER

Built for the toughest conditions

- » Sealed to stringent IP54 standard
- » **Sturdy metal housing**
- » On-board PLC functionality and intelligence

Advanced Industrial Automation

OMRON

Rugged & reliable standalone pump and fan inverter

Omron's E7Z IP54 is a true work-anywhere pump and fan inverter that will survive virtually anything you care to throw at it. A rugged metal housing and ventilation system meeting the stringent IP54 standard provides outstanding protection from non-conductive dust and splash damage. Maintaining the inverter electronics in a controlled environment and guaranteeing long, trouble-free operation.

Inside the E7Z IP54's tough exterior lies a world of advanced technology offering you a host of new possibilities. Like CASE (customised application software) for customised control without need of any extra option boards. Like PLC functionality that provides on-board intelligence for standalone applications independent of an external controller. Or like communication with external world allowing you to fully control operation remotely from your standalone application.

E7 IP54 benefits

The work-anywhere inverter:

- Reliable operation even in the harshest conditions thanks to IP54 housing
- Easy cable connections thanks plenty of space inside housing
- Screw-mountable anywhere within your plant
- Easy viewing of inverter states with ruggedized LCD front panel
- Conforms to EMC requirements thank to the unit's built-in industrial filter
- Minimised harmonic distortion with 12-pulse input
- Silent operation with no need for current de-rating in silent mode

With intelligence on-board:

- PLC functionality for standalone operation with optional PLC card
- Simple, direct connection to high-level control systems via Modbus, DeviceNet, ProfiBUS, CANopen and HVAC Fieldbus
- Inverter Customised application software avoiding the use of external controllers
- Optimum economy with advanced energy-saving algorithm

Designed from one viewpoint... yours!

Customised application software fully adaptable to your needs

Our software engineers are in continuous contact with customers – discovering their needs and refining special software to meet them. As a result, E7Z inverter software is fully customisable to your requirements.

• Built-in pump sequencer ensures optimum pump action

Providing optimum control and economy, the built-in pump sequencer automatically switches-in auxiliary pumps to support the main (PID-controlled modulated) pump to meet increased flow demand. It also provides automatic auxiliary-pump cycling for balanced operation.

Other important features include:

- Pressure feedback signal: 0 – 10 V sensor, 0 – 20 mA
- 4 – 20 mA OR inverted sensor
- Modulated pump automatic frequency drop and rise
- Specific fault and alarm messages
- Pump override eliciting automatic/manual emergency mode-operation
- Test operation

A new world of possibilities with PLC functionality

• Distributed I/Os for standalone operation

You can allocate up to 256 I/Os (digital or analogue) controlled via Omron's Compobus Network. These allow you to connect a broad range of sensors Giving you total independence from your main control room.

• Dnet communications

The PLC option board provides communication with the outside world thanks to the Dnet slave availability.

• Wired or GSM connectivity

You can gather all the information you need to monitor and manage your installation from your PC or arrange alarms and warnings to be transmitted to your mobile phone.

• Settings easily updated with HMI

Via the PLC option board serial port, you can easily update your settings and get information locally through an HMI terminal.

CIMR-E7Z

Varispeed E7

Frequency inverter for pumps and fans

- Energy saving function.
- Advanced PID controller with dedicated HVAC functions.
- 12 pulse operation for harmonics reduction.
- Speed search.
- Standard RS-485 communication - MODBUS.
- Optional network cards (DeviceNet, PROFIBUS, CANOpen, LONWORKS).
- CE, UL, and cUL marked and Germanischer Lloyds approval.
- Embedded OMRON PLC functionality with PLC option card
- PC configuration tool CX-drive.
- CE, UL, and cUL marked and Lloyds approval.

E7IP54

- Robust metal chassis.
- LCD operator.
- Built in RFI filter.

Customized software

- The inverter software can be customized to meet specific application. Examples:
- Pump sequencer (S-8801).

*For detailed information please refer to CASE software section.

Ratings

- 200 V Class 0.4 to 110 kW.
- 400 V Class 0.4 to 300 kW.

System configuration

* E7 IP54 types are built-in filter inverters.

Type designation

200 V class

Model CIMR-E7Z□		20P4	20P7	21P5	22P2	23P7	25P5	27P5	2011	2015	2018	2022	2030	2037	2045	2055	2075	2090	2110
Max. applicable motor output ¹ Kw		0.55	0.75	1.5	2.2	3.7	5.5	7.5	11	15	18.5	22	30	37	45	55	75	90	110

Common specifications

Model Number CIMR-E7Z□		Specification	
Control characteristics	Control method	Sine wave PWM V/f control	
	Speed control range	1:40	
	Speed control accuracy	±3 (25 °C ± 10 °C)	
	Frequency control range	0.0 to 200.0 Hz	
	Frequency accuracy (temperature characteristics)	Digital references: ± 0.01% (-10 °C to +40 °C)	
		Analog references: ±0.1% (25 °C ±10 °C)	
	Frequency setting resolution	Digital references: 0.01 Hz	
		Analog references: 0.025/50 Hz (11 bits plus sign)	
	Output frequency resolution	0.01 Hz	
	Frequency setting signal	0 to +10 V, 4 to 20 mA	
	Accel/decel time	0.01 to 6000.0 s (2 selectable combinations of independent acceleration and deceleration settings)	
Protective functions	Braking torque	Approximately 20%	
	Main control functions	Restarting for momentary power loss, speed searches, overtorque detection, 5-speed control (maximum), acceleration/deceleration time changes, S-curve acceleration, 3-wire control, autotuning, cooling fan ON/OFF control, torque compensation, jump frequencies, upper and lower limits for frequency references, DC braking for starting and stopping, high-slip braking, PI control (with sleep function), energy-saving control, MEMOBUS communications (RS-485/422, 19.2 kbps maximum), fault reset, and copy function.	
	Motor protection	Protection by electronic thermal overload relay.	
	Instantaneous overcurrent protection	Stops at approx. 200% of rated output current.	
	Fuse blown protection	Stops for fuse blown.	
	Overload protection	120% of rated output current for 1 minute	
	Overvoltage protection	200 class inverter: stops when main-circuit DC voltage is above 410 V. 400 class inverter: stops when main-circuit DC voltage is above 820 V.	
	Undervoltage protection	200 class inverter: stops when main-circuit DC voltage is below 190 V. 400 class inverter: stops when main-circuit DC voltage is below 380 V.	
	Momentary power loss ride through	By selecting the momentary power loss method, operation can be continued if power is restored within 2 s.	
	Cooling fin overheating	Protection by thermistor.	
	Stall prevention	Stall prevention during acceleration, deceleration, or running.	
Protective structure	Grounding protection	Protection by electronic circuits.	
	Charge indicator	Lights up when the main circuit DC voltage is approx. 50 V or more.	
	Protective structure	Enclosed wall-mounted type (NEMA 1): 18.5 kW or less (same for 200 V and 400 V class inverters)	
		Open chassis type (IP00): 22 kW or more (same for 200 V and 400 V class inverters)	
		Enclosed wall-mounted type (IP54): From 7.5 Kw to 55 Kw (400 V class inverters)	
	Ambient operating temperature	-10 °C to 40 °C (enclosed wall-mounted type) - 10 °C to 45 °C (open chassis type)	
	Ambient operating humidity	95% max. (with no condensation)	
	Storage temperature	- 20 °C to + 60 °C (short-term temperature during transportation)	
	Application site	Indoor (no corrosive gas, dust, etc.)	
	Altitude	1000 m max.	
	Vibration	10 to 20 Hz, 9.8 m/s2 max.; 20 to 50 Hz, 2 m/s2 max

Attachments

Heatsink external mounting attachment

The Varispeed E7 inverters under the 200/400 V class 18.5 kW or less need this attachment for mounting the heatsink externally. This attachment expands the outer dimensions of the width and height of the inverter. (Attachment is not required for inverters of 22 kW or more.)

	MB				
	MC				
Analog output signals	FM	Multi-function analog output (frequency output)	0 to 10 V, 10 V=100% output frequency	Multi-function analog output 1	0 to +10 V max. ±5% 2 mA max.
	AC	Analog common	—		
	AM	Multi-function analog output (current monitor)	0 to 10 V, 10V = 200% of the inverter rated current	Multi-function analog output 2	
RS-485/422	R+	MEMOBUS communications input	For 2-wire RS-485, short R+ and S+ as well as R- and S-.		Differential input, photocoupler isolation
	R-				
	S+	MEMOBUS communications output			Differential input, photocoupler isolation
	S-				
	IG	Signal common	—		—

Note:

- 1.The default settings are given for terminals S3 to S7. For a 3-wire sequence, the default settings are a 3-wire sequence for S5, multi-step speed setting 1 for S6 and multi-step speed setting 2 for S7.
- 2.Do not use this power supply for supplying any external equipment.
- 3.When driving a reactive load, such as a relay coil with DC power supply, always insert a flywheel diode.

Installation conditions for IP54

Install the inverter vertically in order to ensure a proper cooling. When installing the inverter, always provide the following minimum installation space to allow normal heat dissipation.

1. Always provide enough space for the main circuit or control lines including cable gland.
2. If installing inverters next to one another provide a minimum spacing of 60 mm.

Connections for braking units

1. Varispeed E7 is a built-in filter inverter.

② Communication cards

Type	Model	Description	Function
Communication option cards	3G3RV-PDRT2	DeviceNet option card	• Used for running or stopping the inverter, setting or referencing parameters, and monitoring output frequency, output current, or similar items through DeviceNet communication with the host controller.
	SI-P1	PROFIBUS-DP option card	• Used for running or stopping the inverter, setting or referencing parameters, and monitoring output frequency, output current, or similar items through PROFIBUS-DP communication with the host controller.
	SI-S1	CANopen option card	• Used for running or stopping the inverter, setting or referencing parameters, and monitoring output frequency, output current, or similar items through CANopen communication with the host controller.
	CM090	Ethernet option card	• MODBUS TCP/IP Ethernet interface unit.
	SI-J1	LONWORKS option card	• Used for HVAC control, running or stopping the inverter, setting or referencing parameters, and monitoring output current, watt-hours, or similar items through LONWORKS communications with peripheral devices.

③ PLC Option Card

Type	Model	Description	Function
PLC option cards	3G3RV-P10CDT-E	PLC option	• Full features, wireless installation and seamless access to the inverter parameters and analogue/digital inputs and outputs • Embedded Compobus/S fieldbus • Standard OMRON tools can be used for programming
	3G3-P10CDT-E-DRT	PLC option with DeviceNet	• Same features as standard models with DeviceNet support

④ Accessories

Type	Model	Description	Installation
Digital operators	JVOP-160-OY	5 lines LCD digital operator ¹	 Panel cutout 2-M3 MTG Holes Through Hole Panel cutout installation
	JVOP-161-OY	7 segment LED digital operator	
	JVOP-162	Hand-Off auto operator	
Accessories	3G3IV-PCN126 3G3IV-PCN326	Digital operator extension cable 1 meter 3 meters	-----
	3G3IV-PCN329-E	PC configuration cable	-----

1. LCD digital operator is the Standard in IP54 types.

④ Computer software

Type	Model	Description	Function
Software	CX-drive	Computer software	Configuration and monitoring software tool
	CX-One	Computer software	Configuration and monitoring software tool

	300	4300	4220B	2	4045	9600 W	13.6 Ω	6	110	3.2

1. Load factor during deceleration to stop a load with constant torque. With constant output or continuous regenerative braking, the load factor is smaller than the specified value.
2. Resistance value per one braking unit. Select a resistance value that is larger than connectable minimum resistance value to obtain enough braking torque.
3. For an application with large regenerative power such as hoisting, the braking torque or other items may exceed the capacity of a braking unit with a braking resistor in a standard combination (can result in capacity overload). Contact your OMRON representatives when the braking torque or any other item exceeds the values in the table.

To convert millimeters into inches, multiply by 0.03937. To convert grams into ounces, multiply by 0.03527.

Authorised Distributor:

Control Systems

• Programmable logic controllers • Human-machine interfaces • Remote I/O

Motion & Drives

• Motion controllers • Servo systems • Inverters

Control Components

• Temperature controllers • Power supplies • Timers • Counters • Programmable relays
• Digital panel indicators • Electromechanical relays • Monitoring products • Solid-state relays
• Limit switches • Pushbutton switches • Low voltage switch gear

Sensing & Safety

• Photoelectric sensors • Inductive sensors • Capacitive & pressure sensors • Cable connectors
• Displacement & width-measuring sensors • Vision systems • Safety networks • Safety sensors
• Safety units/relay units • Safety door/guard lock switches
