

NON-ISOLATED DC/DC CONVERTERS

12V Input / Programmable Output / 30A VRM 9.0 Compatible

V7NB-30A180 PRELIMINARY

- High efficiency means less power dissipation
- Remote on/off
- 2-Wire Remote sense
- Optional 5 bit voltage programming schemes
 - Intel VRM 9.x compatible 1.1V to 1.85V
 - Motorola compatible 1.0V to 1.68V
- Adaptive voltage positioning

Description

The V7NB-30A Series are non-isolated step down DC/DC converters providing up to 30A of output current and designed to be compatible to the Intel VRM 9.0 / 9.1 VID codes. Standard features include remote on/off, over current protection, remote sense and a power good signal. This product also makes use of adaptive positioning to improve transient response performance. These products are specifically design to power a wide variety of high performance microprocessors but may be used almost anywhere low-voltage silicon is being employed and a nominal 12V source is available. Typical applications include file servers, work stations and other computing applications.

Input Specifications

Parameter	Min	Typ	Max	Notes
Input Voltage Range	10.8 VDC		13.2 VDC	
Input Current (disabled)		30mA		
Input Current (full load)			6A	
Reflected Ripple Current			100mA rms	With 100uF, 25mOhm capacitor and 200nH of input inductance.

Output Specifications

Parameter	Min	Typ	Max	Notes
Output Current	0A		30A	
Set Point Accuracy	1.81V	1.83	1.85	no load, excluding Adaptive positioning, VID 00000
Adaptive Positioning (Droop Impedance)		3.33 mOhm		
Ripple and Noise		20mV		pk-pk, 0 to 20MHz Bandwidth Full load with two external 560uF oscon capacitors on output.
Turn on Time		8mS	16mS	
Transient Response				di/dt = 5A/uS
Deviation		90mV		Load step =50% of max load.
Settling Time		175uS		Cout = two 820uF OSCON
Remote Sense Compensation		±0.3VDC		
Output Capacitance	1200uF		20,000uF	For applications requiring higher or lower output capacitance please consult factory.

NON-ISOLATED DC/DC CONVERTERS

12V Input / Programmable Output / 30A VRM 9.0 Compatible

General Specifications

Parameter	Specification
Switching Frequency	1.2 MHz typical (fixed)
Dimensions	inches 3.8 x 1.0 x .35 mm 96.5 x 25.4 x 8.9
Operating Temperature	0°C to 70°C
Non-Operating Temperature	-40°C to 100°C
Protection Features	Over current 110% to 170% max Io Undervoltage UVLO Vin < 9.5V
Remote On/Off	Active High
Efficiency (full load)	1.85V output 86%

Part Numbers

There are two different models in this series based on different loop compensation for various types of capacitor banks. These models are as follows:

V7NB-30A180: Compensated for all ceramic capacitor banks consisting of 30-40 22uF ceramic capacitors

V7NB-30A18B: Compensated for capacitor bank utilizing 4-6 820uF Oscon capacitors.

V7NB-30A18M: Compensated for Oscon caps but all output voltages are divided by 1.1 yielding an effective range of 1.0 to 1.68V compatible with the requirements for new Motorola microprocessors.
