Switching of Motors AC-3

3-phase cage motors
(1500 r.p.m)

AC-3 utilization category

When **making**, the motor current is about $6 \times I_n$.
Breaking while the motor is running at I_n motor F.L.C.
Occasional breaking while motor is starting at $6 \times I_n$.

O/L relay class

The table below gives O/L relays
for standard starting times 2 ... 10 s, tripping class **10A**.
Longer starting times require O/L relays tripping class **30** (see page 15).
