ScotchCode™ SDR Dispenser Refill Rolls

This aggressive adhesive system, combined with the flexible polyester film backing, provides a thin, conformable tape that is durable and will hold up in most industrial electrical applications.

The smooth surface of this tape allows dirt and grime to be easily wiped off, providing text legibility even after extended exposure to a build-up of contamination.

ScotchCode™ SDR Wire Marking Tape is available in ten NEMA colours, individual numbers and consecutive numbers, letters and symbols.

Applications

The SDR tape can be used for the following applications involving operating temperatures between -40°C to 121°C (-40°F - 250°F)

- Marking all types of wire and cable including power, control, fiber optic, electronic, telecommunications, and instrumentation
- Phase identification on large or small gauge wire or cable
- Identification of terminal blocks, terminal strips, and wire in panel boards or a piece of switchgear
- Automotive applications on tubing, hoses and replacement parts
