

Horizon Digital Satellite Meter USB

HDSM

The new range of Horizon Global Electronic HDSM USB satellite meter products enables the user to quickly and accurately perform satellite installations saving you time, money and reduce expensive call backs.

Powered from the new high capacity 3300 mAh Ni-Mh battery pack the HDSM USB can take on the most demanding of installation tasks.

Up to 64 satellite selections can be stored by creating your own preferred list directly from the Horizon Global Electronics web site. Rapid access and recall of the last selection used make the HDSM USB even easier to use on multiple installations.

Up to date downloads from our web site will ensure that your meter has the latest settings and you can request custom files for VSAT installations (free of charge).

The HDSM USB comes complete with mains charger cable, in car charger and USB lead for data transfer.

Specification:

- New graphics capable 128 x 64 pixel high brightness backlit LCD
- New Full Speed USB 2 interface with automatic driver download
- Full backwards compatibility with existing HDSM downloads
