

CY3269N LIGHTING STARTER DEMONSTRATION KIT QUICK START GUIDE

1

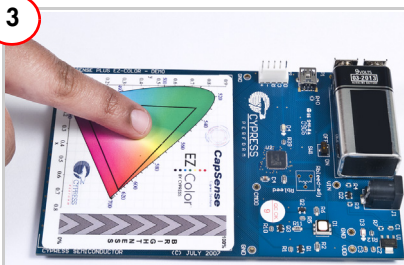

Remove the CY3269N kit from the package.

2

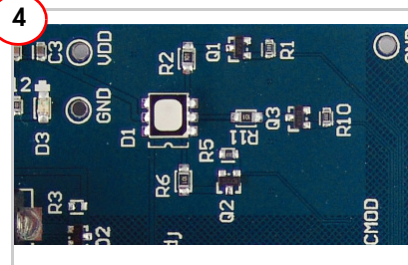

Insert the 9-V battery into the battery holder. Press firmly in place.

3

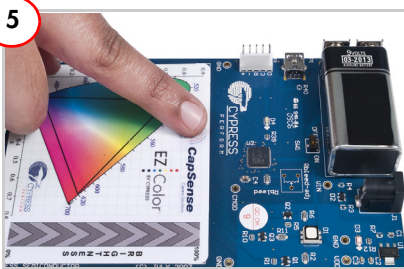

Tap the color gamut to view different colors from the RGB LED. Adjust the brightness using the slider available to the right of the gamut.

4

View the output on the RGB LED.

5

To put the board to "sleep" while powered, press and hold the circular emblem to the left of the CapSense logo.

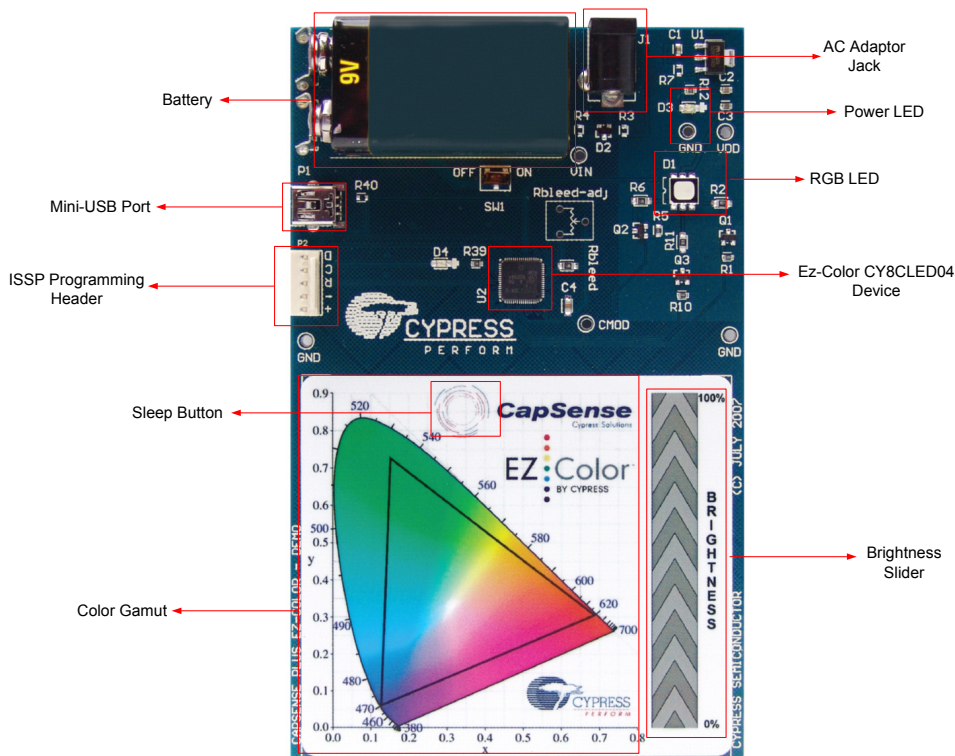

6
