

Vibration and shock absorbing Dampers

Highly damped soft TPO vibration and shock absorbing dampers. High loss coefficient and low resonance magnification. Available in 2 diameters, 3 panel thickness and 2 hardness's. Typical applications include HDD's and PCB's etc.

A one-piece UNC6-32 or M3 shoulder bolt is available for each size, and will ensure optimum performance and easy assembly.

Fixing Bolts.

A one piece-fixing bolt can replace a three-part assembly of screw, washer and tube. Designed to give optimum Compression to the GVD range of dampers. The threads are suitable for screwing directly into a HDD. Available in UNC 6-32 or M3 thread.

Damper and Mounting screw kit

GVSC- kit comprising of 8pcs of each of the GVD dampers the fixing screws.

Mounting Kits

HDD mounting brackets for both 3.5in and 2.5in HDD. Can be used for mounting HDD in either horizontal or vertical position. By using 8 dampers it can protect in XYZ directions. The Kit includes dampers and screws.
