

Twin Industries VME/64x prototyping board, part# 8198-200, facilitates new product development, backplane signal monitoring, load boards, and other applications in the VME/64x environment.

FEATURES:

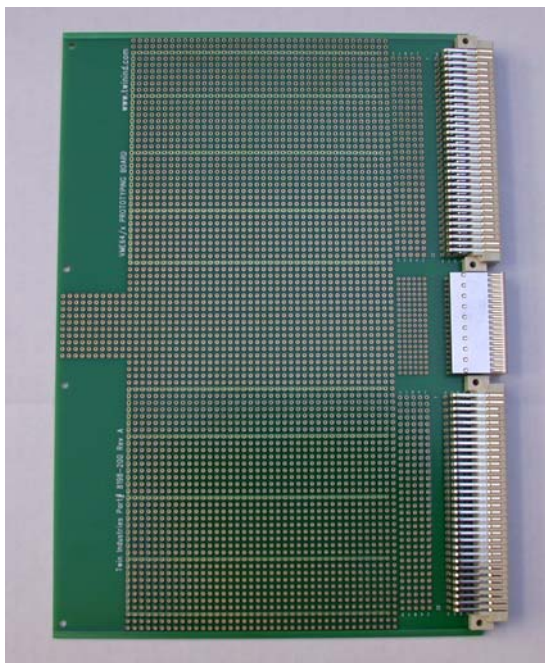

- Support for 160pin DIN and 2mm connectors
- Test points for signal monitoring
- Prototyping holes spaced on 0.1" x 0.1"
- Bus bars, mounting holes for faceplate, and uncommitted area for installing I/O connectors

PART NUMBER

8198-200

Board Dim.: 6U(233mm) x 160mm
