

SN75196 MULTIPLE RS-232 DRIVERS AND RECEIVERS

SLLS188B – MAY 1995 – REVISED APRIL 1998

- Single Chip With Easy Interface Between UART and Serial-Port Connector of an External Modem or Other Computer Peripheral
- Five Drivers and Three Receivers Meet or Exceed the Requirements of TIA/EIA-232-F and ITU Recommendation V.28
- Designed to Support Data Rates up to 120 kbit/s
- ESD Protection Meets Or Exceeds 10 kV on RS-232 Pins and 5 kV on All Other Pins (Human-Body Model)
- Complement to the SN75185
- Pin-to-Pin Replacement for the Goldstar GD75323
- Functional Replacement for the MC145405

DW OR N PACKAGE
(TOP VIEW)

description

The SN75196 combines five drivers and three receivers from the trade-standard SN75188 and SN75189 bipolar quadruple drivers and receivers, respectively. The flow-through design of the SN75196 decreases the part count, reduces the board space required, and allows easy interconnection of the UART and serial-port connector. The all-bipolar circuits and processing of the SN75196 provide a rugged, low-cost solution for this function.

The SN75196 complies with the requirements of TIA/EIA-232-F and ITU (formerly CCITT) V.28 standards. These standards are for data interchange between a host computer and peripheral at signal rates of up to 20 kbit/s. The switching speeds of the SN75196 are fast enough to support rates of up to 120 kbit/s with lower capacitive loads (shorter cables). Interoperability at the higher signaling rates cannot be assured unless the designer has design control of the cable and the interface circuits at both ends. For interoperability at signaling rates of up to 120 kbit/s, use of TIA/EIA-423-B (ITU V.10) and TIA/EIA-422-B (ITU V.11) standards are recommended.

The SN75196 is characterized for operation over a temperature range of 0°C to 70°C.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

PRODUCTION DATA information is current as of publication date. Products conform to specifications per the terms of Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

SN75196

MULTIPLE RS-232 DRIVERS AND RECEIVERS

SLLS188B – MAY 1995 – REVISED APRIL 1998

absolute maximum ratings over operating free-air temperature (unless otherwise noted)[†]

Supply voltage, V_{CC} (see Note 1)	10 V
Supply voltage, V_{DD} (see Note 1)	15 V
Supply voltage, V_{SS} (see Note 1)	–15 V
Input voltage range, V_I : Driver	–15 V to 7 V
Receiver	–30 V to 30 V
Output voltage range, V_O (Driver)	–15 V to 15 V
Low-level output current, I_{OL} (Receiver)	20 mA
Continuous total power dissipation	See Dissipation Rating Table
Electrostatic discharge: DY and RA to GND (see Note 2)	Class 3, A: 10 kV, B: 500 V
All pins (see Note 2)	Class 3, A: 5 kV, B: 300 V
Storage temperature range, T_{stg}	–65°C to 150°C
Lead temperature 1,6 mm (1/16 inch) from case for 10 seconds	260°C

[†] Stresses beyond those listed under “absolute maximum ratings” may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under “recommended operating conditions” is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

NOTES: 1. All voltages are with respect to the network ground terminal.
2. Per MIL-PRF-38535, Method 3015.7

DISSIPATION RATING TABLE

PACKAGE	$T_A \leq 25^\circ\text{C}$ POWER RATING	DERATING FACTOR [‡] ABOVE $T_A = 25^\circ\text{C}$	$T_A = 70^\circ\text{C}$ POWER RATING
DW	1125 mW	9.0 mW/°C	720 mW
N	1150 mW	9.2 mW/°C	736 mW

[‡] This is the inverse of the traditional junction-to-case thermal resistance ($R_{\theta JA}$).

recommended operating conditions

		MIN	NOM	MAX	UNIT

supply currents over operating free-air temperature range

PARAMETER	TEST CONDITIONS			MIN	MAX	UNIT
I_{DD} Supply current from V_{DD}	All inputs at 1.9 V, No load		$V_{DD} = 9\text{ V}, V_{SS} = -9\text{ V}$	25		mA
			$V_{DD} = 12\text{ V}, V_{SS} = -12\text{ V}$	32		
	All inputs at 0.8 V, No load		$V_{DD} = 9\text{ V}, V_{SS} = -9\text{ V}$	7.5		
			$V_{DD} = 12\text{ V}, V_{SS} = -12\text{ V}$	9.5		
I_{SS} Supply current from V_{SS}	All inputs at 1.9 V, No load		$V_{DD} = 9\text{ V}, V_{SS} = -9\text{ V}$	-25		mA
			$V_{DD} = 12\text{ V}, V_{SS} = -12\text{ V}$	-32		
	All inputs at 0.8 V, No load		$V_{DD} = 9\text{ V}, V_{SS} = -9\text{ V}$	-5.3		
			$V_{DD} = 12\text{ V}, V_{SS} = -12\text{ V}$	-5.3		
I_{CC} Supply current from V_{CC}	$V_{CC} = 5\text{ V},$	All inputs at 5 V, No load		20		mA

DRIVER SECTION

electrical characteristics over operating free-air temperature range, $V_{DD} = 9\text{ V}, V_{SS} = -9\text{ V}, V_{CC} = 5\text{ V},$ (unless otherwise noted)

PARAMETER	TEST CONDITIONS			MIN	TYP	MAX	UNIT
V_{OH} High-level output voltage	$V_{IL} = 0.8\text{ V},$	$R_L = 3\text{ k}\Omega,$	See Figure 1	6	7.5		V
V_{OL} Low-level output voltage (see Note 3)	$V_{IH} = 1.9\text{ V},$	$R_L = 3\text{ k}\Omega,$	See Figure 1	-7.5	-6		V
I_{IH} High-level input current	$V_I = 5\text{ V},$	See Figure 2			10		μA
I_{IL} Low-level input current	$V_I = 0,$	See Figure 2			-1.6		mA
$I_{OS(H)}$ High-level short-circuit output current (see Note 4)	$V_{IL} = 0.8\text{ V},$	$V_O = 0,$	See Figure 1	-4.5	-9	-19.5	mA
$I_{OS(L)}$ Low-level short-circuit output current (see Note 4)	$V_{IH} = 2\text{ V},$	$V_O = 0,$	See Figure 1	4.5	9	19.5	mA
r_o Output resistance (see Note 5)	$V_{CC} = V_{DD} = V_{SS} = 0, V_O = -2\text{ V to } 2\text{ V}$			300			Ω

NOTES: 3. The algebraic convention, where the more positive (less negative) limit is designated as maximum, is used in this data sheet for logic levels only, e.g., if -10 V is a maximum, the typical value is a more negative voltage.
4. Output short-circuit conditions must maintain the total power dissipation below absolute maximum ratings.
5. Test conditions are those specified by TIA/EIA-232-F and as listed above.

switching characteristics, $V_{DD} = 12\text{ V}, V_{SS} = -12\text{ V}, V_{CC} = 5\text{ V} \pm 10\%, T_A = 25^\circ\text{C}$

PARAMETER	TEST CONDITIONS			MIN	TYP	MAX	UNIT
t_{PLH} Propagation delay time, low- to high-level output	$R_L = 3\text{ k}\Omega$ to $7\text{ k}\Omega,$	$C_L = 15\text{ pF},$	See Figure 3		315	500	ns
t_{PHL} Propagation delay time, high- to low-level output	$R_L = 3\text{ k}\Omega$ to $7\text{ k}\Omega,$	$C_L = 15\text{ pF},$	See Figure 3		75	175	ns
t_{TLH} Transition time, low- to high-level output (see Note 6)	$R_L = 3\text{ k}\Omega$ to $7\text{ k}\Omega$	$C_L = 15\text{ pF},$	See Figure 3		60	100	ns
		$C_L = 2500\text{ pF},$	See Figure 3 and Note 6		1.7	2.5	μs
t_{THL} Transition time, high- to low-level output (see Note 7)	$R_L = 3\text{ k}\Omega$ to $7\text{ k}\Omega$	$C_L = 15\text{ pF},$	See Figure 3		40	75	ns
		$C_L = 2500\text{ pF},$	See Figure 3 and Note 7		1.5	2.5	μs

NOTES: 6. Measured between -3-V and 3-V points of the output waveform (TIA/EIA-232-F conditions), all unused inputs are tied either high or low.
7. Measured between 3-V and -3-V points of the output waveform (TIA/EIA-232-F conditions), all unused inputs are tied either high or low.

APPLICATION INFORMATION

Diodes placed in series with the V_{DD} and V_{SS} terminals protect the SN75196 in the fault condition when the device outputs are shorted to V_{DD} or V_{SS} and the power supplies are at low and provide low-impedance paths to ground (see Figure 15).

Figure 15. Power-Supply Protection to Meet Power-Off Fault Conditions of TIA/EIA-232-F

[†] See Figure 10 to select the correct values for the loading capacitors (C1, C2, C3, C4, and C5), which may be required to meet the RS-232 maximum slew-rate requirement of 30 V/μs. The value of the loading capacitors required depends upon the line length and desired slew rate, but is typically 330 pF.

NOTE A: To use the receivers only, V_{DD} and V_{SS} must both be powered or tied to ground.

Figure 16. Typical TIA/EIA-232-F Connection

PACKAGING INFORMATION

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "-" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

(6) Lead/Ball Finish - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead/Ball Finish values may wrap to two lines if the finish value exceeds the maximum column width.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

 - D. Falls within JEDEC MS-013 variation AC.

DW (R-PDSO-G20)

PLASTIC SMALL OUTLINE

- NOTES:
- A. All linear dimensions are in millimeters.
 - B. This drawing is subject to change without notice.
 - C. Refer to IPC7351 for alternate board design.
 - D. Laser cutting apertures with trapezoidal walls and also rounding corners will offer better paste release. Customers should contact their board assembly site for stencil design recommendations. Refer to IPC-7525
 - E. Customers should contact their board fabrication site for solder mask tolerances between and around signal pads.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
