

Platoshear Cutter

170

Plato shears have a thin profile designed for those hard-to-reach areas in electronic assembly. Assemblers love the effortless shearing action, comfort, light weight, and safety for electronics lead and wire cutting. Platoshears use the shear cutting method, which requires 50% less operator effort and extends cutting life because they shear rather than pinch. Handles are cushioned for day long comfort, and automatically spring back to their original position after each use.

High precision shear lead cutter

Flush cuts component leads as large as 18 AWG copper wire (.040"/1.0mm). Weighs 1.8oz. (51g) and is 5.15" (131mm) long.

Product Dimensions
