

Product Update: Update of Improved Packaging for Certain Industrial Switches, PCN #0083 and 0086

Honeywell is sharing an update in improved packaging and the use of a second source for the improved packaging. Previously, many switches were packaged in a simple polyethylene bag for transportation. The new package will be the exact same size back with the same thickness and will add an Electrostatic Discharge (ESD) treatment. Additionally, Honeywell, in order to improve the robustness of supply, has added a second source for this bag.

The addition of the ESD treatment will have no effect on the form, fit, or function of the finished goods. However, it will add a level of protection for electrostatic events. The package may appear slightly different in color or texture due to the addition of the ESD treatment.

CONTACT INFORMATION

Honeywell is committed to providing you with a superior level of customer service. Please contact your Honeywell representative for additional information regarding this communication.

WARRANTY/REMEDY

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship during the applicable warranty period. Honeywell's standard product warranty applies unless agreed to otherwise by Honeywell in writing; please refer to your order acknowledgement or consult your local sales office for specific warranty details. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace, at its option, without charge those items that Honeywell, in its sole discretion, finds defective. **The foregoing is buyer's sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose. In no event shall Honeywell be liable for consequential, special, or indirect damages.**
