

Product Description

Polarity identification is possible without stripping the sheath or external marking (the item designation is always printed on the positive pole). This rules out incorrect connections.;No brushing of cores after stripping and therefore optimum subsequent handling, for example when crimping/contacting;Special ADR approval

Application range

- Battery cable between the power source and the end user
- Commercial vehicles

Benefits

- Polarity identification is possible without stripping the sheath or external marking (the item designation is always printed on the positive pole). This rules out incorrect connections.
- No brushing of cores after stripping and therefore optimum subsequent handling, for example when crimping/contacting
- Special ADR approval

Design

- Strands of bare copper wires
- Core insulation: Based on PVC
- Special PVC-based outer sheath

Product features

- Double-sheathed version, extremely tough, for installation without corrugated tubing
- Very strong connection but offering easy separation of the cable by hand

Technical Data
Insulation resistance

10 MOhm x km

Minimum bending radius

15 x outer diameter

Nominal voltage

60 V DC

Test voltage

3000 V AC

Temperature range

Fixed installation: -40°C to +85°C

Area of application, Class A
