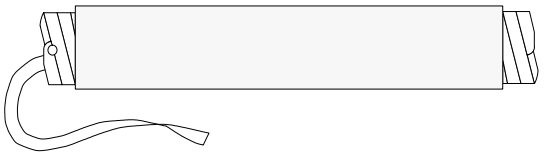
Cold Shrink™ Connector Insulators

8420 Series



Data Sheet

1. Product Description

3M™ Cold Shrink™ Connector Insulators are open-ended, tubular, rubber sleeves which are factory expanded and assembled onto a removable core. The core is removed after the tube has been positioned for installation over an inline connection, terminal lug, etc., allowing the tube to shrink and form a water-resistant seal. The insulating tube is made of EPDM rubber which contains no chlorides or sulfurs. Six diameter sizes will cover a range of 1000 volt cable from 10 AWG through 1000 kcmil, copper and aluminum conductors.

To extend the useful life of this product in applications which are continuously exposed to high levels of ultra-violet radiation, overwrap with Scotch™ Super 33+ Vinyl Tape or Scotch™ 70 Silicone Tape.

Features:

Simple installation, requires no tools.

Accommodates a wide range of cable sizes.

No torches or heat required.

Good thermal stability.

Seals tight, retains its resiliency and pressure even after prolonged years of aging and exposure.

Excellent wet electrical properties.

Improved, tougher rubber formulation to withstand backfilling.

Water-resistant. Meets the water seal requirements of ANSI C119.1.

No mastic or tape required to seal.

Resists fungus.

Resists acids and alkalies.

Resists ozone.
