

The ultimate combination of comfort and dexterity

The Matrix® P Grip from Polyco is a seamless nylon liner with a polyurethane palm coating. A snug fit offers excellent comfort and dexterity whilst the coating performs well for abrasion and tear resistance.

The tight fitting design of the Matrix® P Grip makes it extremely tactile and perfect for meticulous tasks that require care and precision. The palm of the glove has been coated with polyurethane providing an assured grip in both wet and dry conditions therefore making it extremely versatile in general handling applications. The back of the hand has been left uncoated to enable the hand to breathe keeping it cool and allowing for prolonged use without discomfort. It also has an elasticated knit wrist that further enhances the fit. These properties make the Matrix® P Grip a great choice of glove, with the additional bonus of being incredibly good value for money.

Case Quantity
12 pairs per polybag
144 pairs per case

Handling Applications

- Component Handling
- General Assembly
- Electronics
- Light Engineering
