Overview

## Pan-Way® TG-70 Raceway Accessories

B1.  
Cable Ties

- TG-70 accessories consist of device mounting brackets, standard faceplate brackets for data, wire retainers and fiber spool brackets; the three-sided hanging box is used to mount NEMA standard single gang outlet and communications devices

| Part Number          | Part Description                                                                                                                                                                                                                                                                                        | Color | Std. Pkg. Qty. | Std. Ctn. Qty. |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|----------------|----------------|
| <b>T70DB-X</b>       | Device mounting bracket. Used to mount NEMA standard single gang electrical outlets and communication devices with either screw-on or snap-on single gang faceplates. Can be used with T-70, Twin-70, and TG-70 raceway.                                                                                | Gray  | 10             | —              |
| <b>T70SDB-X</b>      | Standard faceplate bracket. Used to mount NEMA standard 70mm single gang screw-on faceplates. Can be used with T-70, Twin-70, TG-70 raceway and Pan-Pole™ Communication Pole.                                                                                                                           | Gray  | 10             | —              |
| <b>TG70HB3-X</b>     | 3-sided hanging box. Mounts standard electrical outlets or communication devices with either NEMA standard single gang screw-on or Panduit snap-on faceplates. When used with TGDW divider wall, box separates and fully encloses device to provide cabling separation.                                 | Gray  | 10             | —              |
| <b>TG70HB3GFCI-X</b> | GFCI 3-sided hanging box. Accepts single gang U.S. GFCI (ground fault circuit interrupter) standard electrical devices. Provides increased internal area for connections and excess wire.                                                                                                               | Gray  | 10             | —              |
| <b>TG70WR-X</b>      | Wire retainer. Holds wires in place during installation.                                                                                                                                                                                                                                                | Gray  | 10             | 100            |
| <b>TGFSB</b>         | Fiber spool bracket. Each piece consists of two halves that snap into base of TG raceway. Provides method to contain one meter or more of fiber slack and acts as a strain relief while maintaining a minimum 32mm bend radius. Bracket separation can be adjusted to fit the length of slack required. | Gray  | 1              | 10             |
