

Rota-Spray 'Plus'

A Spray Processor with many advanced features making an ideal upgrade to a Bubble Etch Tank. The 'Rota-Spray Plus' is a Spray Processor with an in-built Spray Wash Tank and an additional static unheated Developing Tank enabling the unit to be used as an Develop / Spray Wash / Spray.

- **Digital temperature control** - Set and control temperatures accurately.
- **Transparent case design** - Panels can be examined after processing without removing.
- **Integral Spray Wash Tank** - Washes the entire board holder to keep whole etching process clean. Fitted with adjustable spray bars.
- **Etches PCBs in less than 90 seconds!** - 3-4 times faster than a Bubble Etch Tank.
- **Static Developing Tank, unheated with bottom drain.**
- **Bottom drain with secure fastening** - No syphoning necessary.
- **Splash hopper included** - Helps to contain chemistry to aid clean processing.
- **Safety cut-out on lid** - Motor cuts off if lid is raised during etching.
- **Optional Base Unit available** (shown in photograph)- Places the top of the unit at an efficient working height of 110 cm.
- **New Board Holder** - Takes multiple small boards. Low profile design means less etchant or developer collects on board holder keeping processing cleaner.
- **Digital timer controls processing time** - As the board is not immersed in liquid, there is no over-processing after completion. This makes over-etching very difficult.
- **10" x 12" (254 x 305 mm) Board capacity**
- **Dimensions :** 'Rota-Spray Plus' H 650 mm, W 540 mm, D 500 mm
- **Optional Base Unit Height :** 450 mm
