

AccuMate Compact 12V chargers and power supplies

Available with European and UK plug pin patterns, this compact yet high quality 4-stage maintenance charger for all types of 12V lead-acid batteries plugs directly into the power outlet (wall socket).

The plug pins of the European models can be rotated 90° in relation to the body of the charger to allow it to be plugged into sockets even where there is some obstruction close by.

Furthermore, each charger comes with a selection of plastic plug props that can be plugged into (& protrude from) holes in the lower edge of the charger housing so as to relieve the stress on the socket due to the weight and rotational leverage of the charger when plugged into 2-pin Euro sockets.

Certain models have a second switch-selectable function, a stabilised 12Vdc power supply delivering up to 600mA which can also be used to recharge NiCd & NiMH battery packs in portable appliances.

Model selection for European sockets :

Without the 12Vdc power supply function selection :

Packaged in Dutch, French, German
Reference TM-23.

English, Italian, Spanish
Reference TM-27.

Model selection for U.K. sockets :

With the supplementary 12Vdc power supply function selection

English
Reference TM-21.

Specifications:

- Charging circuit will engage & attempt to recharge any 12V lead-acid battery retaining at least 2V at the moment of connection; i.e. even a very flat battery.
- 3m long output cable, plus 2 detachable & replaceable connection sets, the one with metal eyelets for permanent fixing to the battery posts and easy & quick connection /disconnection to batteries on the vehicle, the other with battery clips for charging & maintenance of batteries removed from the vehicle.
- Models TM-20, TM-21, TM-26 with 12Vdc function come with an additional connection set with 4 different plug heads to allow connection to diverse input jacks.
- Recommended for all 12V lead-acid batteries from 2Ah to 32Ah, the AccuMate Compact can also maintain larger batteries (they will just take longer to charge).
- Comprehensive selection of connection accessory aids including a 2,5m output extension cable set.
- Full electronic protections against user error such as output short-circuit & wrong battery connections.
- Spark generation is suppressed even in short-circuit.
- Meets all relevant EN & IEC norms and CE directives.

2 year limited warranty.
