RIGHT ANGLE DC LOCKING POWER JACKS

Similar to the PC712A, PC722A, and PC732A, the new versions have RAPC terminals to allow right angle mounting to the PC board. The new versions have threaded bushings to allow use of both standard and locking power plugs. The L versions of the new power jacks have a longer bushing (0.319”)to accommodate thicker panel mount applications. Available in the same pin diameters as our existing line of power jacks (0.050”, 0.080”, and 0.100”). The new power jacks are perfect for applications where the customer needs a locking feature, but cannot use a standard vertical PC mount jack.
