

Electronic overload relay EF19 and EF45

Electronic overload relays are the alternative to the thermal overload relays. An electronic overload relay offers reliable and fast protection for motors in the event of overload or phase failure. Starter combinations are setup together with contactors.

Description

- Overload protection – trip class 10E, 20E, 30E selectable
- Phase loss sensitivity
- Temperature compensation from -25 ... +70 °C
- Adjustable setting current for overload protection
- Automatic- or manual reset selectable
- Trip-free mechanism
- STOP- and Test function
- Mounting direct onto contactor
- Sealable operating elements
- Self-supplied devices

Order data

EF19, EF45 Screw terminal
For AF09...AF26 block contactors

Setting range [A]	Type	Order code	Suitable for	Packing unit [Pcs]	Weight [g]
0.10 ... 0.32	EF19-0.32	1SAX121001R1101	AF09...AF38	1	158
0.30 ... 1.00	EF19-1.0	1SAX121001R1102	AF09...AF38	1	158
0.80 ... 2.70	EF19-2.7	1SAX121001R1103	AF09...AF38	1	158
1.90 ... 6.30	EF19-6.3	1SAX121001R1104	AF09...AF38	1	158
5.70 ... 18.9	EF19-18.9	1SAX121001R1105	AF09...AF38	1	158
9.00 ... 30.0	EF45-30	1SAX221001R1101	AF26...AF38	1	362
15.0 ... 45.0	EF45-45	1SAX221001R1102	AF26...AF38	1	362

Suitable for mounting on:

AF09, AF12, AF16

AF26, AF30, AF38

Application / internal function

The self-supplied electronic overload relays are three pole electronic/mechanical devices. The motor current flows through build-in current transformers and an evaluation circuit will recognize an overload (over current). This will lead to a release of the relay and a change of the contacts switching position (95-96 / 97-98). The contact 95-96 is used to control the load contactor. The electronic overload relay is self-supplied, which mean no extra external supply is needed.

Operation mode

	contact „95-96“	contact „97-98“	Opto-Mechanical slide	Comment
TRIP-state	open	closed		
RESET-state	closed	open	ON	
Test - Manual mode -	open	closed		
Test - Auto-mode -	open	closed		
STOP - while device in TRIP-state	open	closed		STOP - button has no function
STOP - while device in RESET-state	open	open		While STOP - button is pressed

Connection

Connections to Contactor
Terminals (1L1, 3L2, 5L3)

Current setting range

STOP

Tripping contact (95-96)

Trip indication / Test function

Reset button / Selection automatic – or manual reset

Signaling contact (97-98)

Terminals 2T1, 4T2, 6T3
