

DATA SHEET

SMV2201-SMV2205 Series: Surface Mount, 0402 Silicon Hyperabrupt Tuning Varactor Diodes

Applications

- Wide bandwidth, low phase noise VCOs
- Wide range voltage-tuned phase shifters and filters

Features

- High Q, low series resistance
- High capacitance ratio at low reverse voltage
- Industry-standard 0402 footprints
- Packages rated MSL1, 260 °C per JEDEC J-STD-020

Skyworks Pb-free products are compliant with all applicable legislation. For additional information, refer to *Skyworks Definition of Lead (Pb)-Free*, document number SQ04-0073.

**Description**

The SMV2201-SMV2205 series are silicon hyperabrupt junction varactor diodes specifically designed for wide bandwidth, low-loss applications. The specified high capacitance ratio and low reverse voltage make these varactors appropriate for low phase noise Voltage Controlled Oscillators (VCOs) used at frequencies in wireless systems up to and above 2.5 GHz.

Table 1. SMV2201-SMV2205 Series Absolute Maximum Ratings

Parameter	Symbol	Minimum	Maximum	Units
Forward current	I_F		20	mA
Reverse voltage	V_R		22	V
Dissipated power @ 25 °C	P_D		750	mW
Storage temperature	T_{STG}	-55	+200	°C
Junction temperature	T_J	-55	+175	°C
Solder interface temperature	T_S	-40	+85	°C

Note: Exposure to maximum rating conditions for extended periods may reduce device reliability. There is no damage to device with only one parameter set at the limit and all other parameters set at or below their nominal value. Exceeding any of the limits listed here may result in permanent damage to the device.

CAUTION: Although these devices are designed to be as robust as possible, Electrostatic Discharge (ESD) can damage them. These devices must be protected at all times from ESD. Static charges may easily produce potentials of several kilovolts on the human body or equipment, which can discharge without detection. Industry-standard ESD precautions should be used at all times.

Table 2. SMV2201-SMV2205 Series Electrical Specifications (Note 1)
($T_S = +25\text{ °C}$, Characteristic Impedance $[Z_0] = 50\ \Omega$, Unless Otherwise Noted)

Part #	Minimum VBR @ 10 μA (V)	Maximum IR @ 17.6 V (nA)	Capacitance				Minimum Quality Factor, Q, @ 4.0 V, f = 50 MHz	Typical Ls (nH)	Typical Cp (pF)
			CT @ 4.0 V (pF)		CT @ 20.0 V (pF)				
			Min	Max	Min	Max			
SMV2201-040LF	22	50	0.73	0.98	0.18	0.33	500	0.45	0.075
SMV2202-040LF	22	50	1.18	1.53	0.28	0.43	500	0.45	0.075
SMV2203-040LF	22	50	1.63	2.08	0.37	0.54	400	0.45	0.075
SMV2204-040LF	22	50	2.53	3.18	0.53	0.78	400	0.45	0.075
SMV2205-040LF	22	50	4.33	5.38	0.83	1.18	400	0.45	0.075

Note 1: Performance is guaranteed only under the conditions listed in this Table.

Electrical and Mechanical Specifications

The absolute maximum ratings of the SMV2201-SMV2205 series are provided in Table 1. Electrical specifications are provided in Table 2. Table 3 summarizes the capacitance for reverse voltages between 0 and 20 V.

Typical performance characteristics of the SMV2201-SMV2205 SERIES are illustrated in Figures 1 and 2.

The SPICE model for the SMV2201-SMV2205 varactors is shown in Figure 3 and the associated model parameters are provided in Table 4.

Package Dimensions

The PCB layout footprint for the SMV2201-SMV2205 series is provided in Figure 4. Typical case markings for each of the

varactors in the series are listed in Table 5 and illustrated in Figure 5. Package dimensions for the SMV2201-SMV2205 series are provided in Figure 6. Tape and reel dimensions are provided in Figure 7.

Package and Handling Information

Instructions on the shipping container label regarding exposure to moisture after the container seal is broken must be followed. Otherwise, problems related to moisture absorption may occur when the part is subjected to high temperature during solder assembly.

The SMV2201-SMV2205 series are rated to Moisture Sensitivity Level 1 (MSL1) at 260 °C. They can be used for lead or lead-free soldering. For additional information, refer to the Skyworks Application Note, *Solder Reflow Information*, document number 200164.

Care must be taken when attaching this product, whether it is done manually or in a production solder reflow environment. Production quantities of this product are shipped in a standard tape and reel format.

SMV2204-040LF	DF1
SMV2205-040LF	DH1

Figure 5. SMV2201-SMV2205 Typical Case Markings (Top View)

Top View: Shows a rectangular assembly with a central row of 12 circular holes. The overall width is 8.00 ± 0.1 . The distance from the center of the first hole to the right edge is 1.75 ± 0.10 . The distance between the centers of adjacent holes is 2.00 ± 0.05 . The diameter of the holes is $\varnothing 1.55 \pm 0.05$ (D0). The diameter of the mounting holes is $\varnothing 0.40 \pm 0.05$ (D1). The distance from the center of the first hole to the left edge is 4.00 ± 0.10 . The distance from the center of the last hole to the right edge is 2.00 ± 0.05 . The distance from the center of the first hole to the center of the last hole is 2.00 ± 0.05 . The distance from the center of the first hole to the center of the last hole is 2.00 ± 0.05 . The distance from the center of the first hole to the center of the last hole is 2.00 ± 0.05 .

Side View: Shows the profile of the assembly. The total height is 1.15 ± 0.05 (B0). The distance from the top surface to the center of the mounting holes is 0.47 ± 0.05 (K0). The distance from the center of the mounting holes to the bottom surface is 0.20 . The distance from the center of the mounting holes to the top surface is 0.47 ± 0.05 (K0).

Detail View B: Shows a detail of the mounting holes. The distance between the centers of adjacent mounting holes is 0.70 ± 0.05 (A0).

Notes:

1. Carrier tape: black conductive polycarbonate.
2. Cover tape: transparent conductive material.
3. Cover tape size: 5.4 mm width.
4. ESD surface resistivity is $\geq 1 \times 10^4 \sim 1 \times 10^8$ Ohms/square.
5. All dimensions are in millimeters.
