

Type PTO Series

Thermometrics PTC Thermistors

Description

GE's PTO series consists of a range of radially-wire bare PTC disc thermistors.

Features

- Low cost solid state sensor
- Available in a broad range of resistances, transition temperatures and voltage ratings
- Exhibits large positive increases in resistance with temperature
- Resistance/temperature characteristic is infinitely repeatable and has no hysteresis associated with its action
- Proven quality and reliability over many years of manufacturing

Applications

- Current regulation
- Circuit protection
- Temperature measurement and control

Operating Voltage, V_{max}	Part Number	Replacement for	R @ 25°C ($\pm 30\%$) Ω	Switch Temperature, T_b	A (max) mm	B (max) mm	C (ref) mm	D (ref) mm	L (min) mm

*Resistance = 2 x Resistance at 25°C

Mechanical Specifications

Construction

Bare ceramic disc
Thick silver film electrodes
Uninsulated leadwires

Terminations

Straight type, tin coated copper wire

Electrical Specifications

Ambient Temperature Range

At Storage: -25 to +155°C

At Maximum Voltage: +10 to +55°C
