

## Load Board 6U

### CompactPCI® Bus

Resistive Load & Voltage Boards  
for 3U & 6U cPCI Applications

Useful for enclosure voltage measurement or providing minimum load for power supply tests.

- 25 Watt Resistive Loads, 4 voltages
- 3U & 6U Versions
- Jacks for Voltage Measurement
- LED Indicators for Each Voltage
- J1 Connector Used
- Low Cost
- Front panel Assembly provided
- Injector/Ejector Handles included

Model CPCI-3U-25-L,  
with inj/ejector &  
Panel

MODEL CPCI-6U-25-L,  
includes inj/ejector &  
panel as shown

| Voltage | Watts |
|---------|-------|
| +5      | 10    |
| +3.3    | 4     |
| +12     | 3     |
| -12     | 1.5   |

### 6U & 3U Load Boards

| Part No.   | Description                         |
|------------|-------------------------------------|
| CPCI-3U25L | Resistive Load Board for 3U Systems |
| CPCI-6U25L | Resistive Load Board for 6U Systems |

## Load Board 6U

### VME & VXI BUS

Resistive Load & Voltage Boards  
for 6U VME & VXI Applications

Useful for enclosure voltage measurement or providing minimum load for power supply tests.

| Voltage | Watts |
|---------|-------|
| +5      | 12    |
| +3.3    | 12    |
| +12     | 12    |
| -12     | 12    |
| +24     | 12    |
| -24     | 12    |
| -2      | 2     |
| -5.2    | 5.2   |

MODEL VVL50/80,  
includes  
Handle/ejectors &  
Alum. front panel

- Mounts in a card slot in a 6U VME Backplane
- Provides 50 Watt load for VME switching power supplies
- Provides 80 watt load for VXI switching power supplies (requires extender board)
- Voltages supported for VME: +5V, +12V, -12V
- Voltages supported for VXI: +5V, +12V, -12V, +24V, -24V, -2V, -5.2V
- Jacks provided for remote meter readout
- LED Indicators for Each Voltage
- Front panel Assembly provided
- Injector/Ejector Handles included
- VME ejector handles provided

| Part No. | Description                                |
|----------|--------------------------------------------|
