

Solenoids

Series 44A Small short stroke, high force Solenoid

GENERAL DESCRIPTION

- AC & DC types
- Pull and thrust versions
- Shading ring for quiet AC operation

PERFORMANCE

Electrical	ITEM	SPECIFICATION
	Maximum on Time	See table below
	Closed power (continuous rating)	AC: 4.3VA DC: 3.0W
	Maximum permissible voltage	240V
Mechanical	Insulation	All coils tested to frame at 1500V RMS 50Hz
	Weight	Total: 47.5g. approx. Plunger: 8.5g
	Ambient temperature	The information given on this page is based on a room temperature of 20°C allowing for a nominal 75°C temperature rise in the coil.
	Force/stroke curves	These force curves show average performance only. In addition to normal manufacturing tolerances, deviations can be expected at some voltages due to the coil winding tolerances.

Our products are designed, manufactured and tested to ISO 9001 quality standards. Some of them are capable of being operated by and capable of switching high voltages and/or currents. Care must therefore be exercised in the installation, protection and use of such products. If in doubt please contact your supplier or Dialight BLP Engineering Department immediately.
