Key Features & Specifications

- This kit contains:
 - PT100 4W Class A RTD Sensor
 - Two standard black dual banana plugs
- This product is to be used in applications where the voltages are less than or equal to 30 Vrms, 42.4 Vpk, and 60 DCV.

Description

The PT100/RTD 4-Wire Class A sensor kit consists of a 4-wire PT100 RTD temperature sensor and two black dual banana plugs. The temperature sensor features easy installation, and silicone-based, self-adhesive backing. Backing can be reapplied. The sensor is a stripped 4-wire configuration (color code: black/black/red/red).

This product is to be used in applications where the voltages are less than or equal to 30 Vrms, 42.4 Vpk, and 60 DCV.

The Agilent 34152A is compatible with the 34460A, 34461A, 34410A, and 34411A.
