### **RUGGED**

- Many parts qualified to SAE-AS81714
- Integrated bus bar technology

### **ENVIRONMENTALLY SEALED**

- Resists fluids commonly found in aerospace and defense applications
- Helps prevent foreign object debris issues

### **EASY TO USE**

- Insertable modules that can be easily removed and reinserted into rails with tools

### **APPLICATIONS**

- Commercial Air
- Space
- Military Ground
- Military Aerospace

The DEUTSCH CTJ Series common termination system from TE Connectivity (TE) is a system of wires and components that are interconnected to one another by the use of a standard AS39029 socket contact only. This eliminates the need for pin contacts which are located in the mating components. Bussed cavities use our single-pin bus bar design. There are multiple design options available to customize the modules, junctions, splices and rails available in Mil Spec-approved AS81714 Series II and non-qualified proprietary designs.

### **TE Advantage**

**DEUTSCH AS39029 Contacts.** All assemblies—modules, splices, etc.—are supplied with DEUTSCH AS39029 socket contacts, which are designed to meet AS39029 standard for ruggedness and vibration resistance.

**Customization.** Products can be customized to help meet your specific needs.

**Single Rail Assembly.** We offer rail assemblies for single-mount components.

**Easy Assembly.** We offer easy insertion and removal of single rails inside multimodule assemblies.

**CTD Bussing Modules** for power distribution.

**CTJ1 Feedback Modules** with various bussing arrangements.

**CTJ4 Electronic Component Modules** design based upon Mil-T-81714/62 electronic modules. Modules are available with a variety of diodes, resistors, capacitors, and fuses, with both M81714/62 equivalents and additional configurations.

**CTJ5 Board-Mount Modules** include solder pin contacts for direct mounting to pc boards and flex cable. By eliminating the need for a mounting rail, CTJ5 modules provide a flexible and compact solution.

**CTJ6 Plug and CTJ9 Receptacle Connectors** provide a small, lightweight method of connecting/disconnecting multiple wires. Available in flange-mount and in-line versions.

**CTJ7 Grounding Modules**, using either flange mount or stud mount, provide sealed multiwire grounding solutions.

**CTJ2 Metallic Mounting Bracket** are aluminum alloy and designed to hold one single module or two half-size modules.

**CTJ3 Metallic Rails** use aluminum alloy and stainless steel clips. They are available with a variety of finishes and sizes ranging from 2 to 40 inches.

**DCR Composite Rails** are a lightweight alternative to CTJ3 rails, offering up to 48% weight savings and available in lengths from 2 to 20 inches.

#### Junctions and Splices

**CTL, CTM and CTN In-Line Junctions** connect two to four wires in-line and multijunctions for housing and sealing individual components. The CTL is an in-line junction for single wires. The CTM connects and buses two, three, or four wires. The CTN series connects contacts electrically with diodes, capacitors, fuses, or resistors.

**Composite In-Line Junctions** are composite versions of the CTL, CTM, and CTN series with electronic components design-in customization.

**CTJ Grounding Junctions** provide a simple method of terminating wire to ground using standard AS39029 contacts.

## CTJ Mil Spec Series General Specifications

The CTJ Mil Spec Series meet requirements of SAE-AS81714.

**Dielectric Withstanding Voltage** (AS81714 paragraph 3.5.6):

At Sea Level: 1500 VAC<sub>rms</sub>  
At 110,000 Ft: 200 VAC<sub>rms</sub>

**Insulation Resistance** (AS81714 paragraph 3.5.11): 5000 MΩ min. at 25°C

**Operating Temperature:** -65°C to +200°C

**Physical Shock:** 78 g in each of the 3 mutually perpendicular planes

**Vibration:** Maintains continuity to minimize mechanical or physical damage during or after vibration following vibration levels

**Level 1—34 minutes per axis**

20–90 Hz at 6 dB/oct. rise

90–300 Hz at 1.0 g<sup>2</sup>/Hz

300–2000 Hz at 6 dB/oct. fall

**Level 2—14 minutes per axis**

20–40 Hz at 6 dB/oct. rise

40–350 Hz at 0.5 g<sup>2</sup>/Hz

350–2000 Hz at 6 dB/oct. fall

No discontinuities greater than  
1 microsecond

**Corrosion:** 48 hours of salt spray

**Magnetic Permeability:** 2.0 μ max.

**Fluid Resistance:**

MIL-PRF-5606: Hydraulic fluid

MIL-DTL-83133: JP-8 aviation fuel

MIL-PRF-7808: Lubricating oil

MIL-PRF-23699: Lubricating oil

MIL-A-8243: Deicing/defrosting fluid

MIL-C-25769: Aircraft cleaning compound

MIL-PRF-87937: Aircraft cleaning compound

MIL-G-3056: Gasoline

## Materials

**Housing:** Composite

**Bus Bar/Pins:** Copper alloy, plated gold

**Sealing Grommet:** Elastomer, fluid resistant and environmentally sealed

**Metal Rails (CTJ2 and CTJ3):** Aluminum alloy, nickel plated (standard). Also available with anodized, olive drab cadmium, or clear finishes. Stainless steel clips

**DCR Rails:** Composite

## Contact Resistance (at 25°C)

Meets AS39029 paragraph 3.5.4

## DEUTSCH CTD and CTJ1 Power Distribution and Feedback Modules

### EASY TO USE

- Busses 6 to 20 contacts in a small area
- Internal bus bars are configured to allow connections of various combinations of wires

### RUGGED

- Uses a rugged A39029 socket contact mated to one-piece (cold-headed) internal pin bus bars
- Excellent vibration resistance
- Environmentally sealed

### CONVENIENT

- Modules fit in single, multiple, composite or metal rails with multiple mounting options
- CTD distribution modules accommodate different sizes of contacts within the same bus

CTD power distribution and CTJ feedback modules for rugged, environmentally sealed bussing of wires.

## DEUTSCH CTJ4 Series Electronic Component Modules

### CONVENIENT

- May be placed near transient suppression devices that they are designed to protect
- Each module houses small printed circuit boards incorporating a variety of discrete electronic components
- Uses crimp-tool terminations and a housing system for discrete components and circuits
- Lightweight composite technology for weight-saving solutions

### ROBUST

- Fluid resistant in most military or aerospace environments
- Input/output wiring is sealed with elastomer grommet to help protect against environmental hazards
- Designed to the electronic requirements of MIL-T-81714/62

### VERSATILE

- Available with a variety of discrete electronic components with both M81714/62 equivalents and additional configurations

CTJ4 electronic component modules are designed to the requirements of MIL-T-81714/62. Modules are available with a variety of diodes, resistors, capacitors and fuses, with both M81714/62 equivalents and additional configurations.

### Specifications

**Operating Temperature:** -65°C to +200°C or IAW Electronic Component (whichever has the lesser requirement)

**Thermal Shock and Vibration:** In accordance with AS81714 or in accordance with electronic component (whichever has the lesser requirement)

## DEUTSCH CTJ5 Series Board-Mount/Pluggable Modules

### CONVENIENT

- Mounts on pc board or flat flex cable
- Uses AS39029 socket contacts to accept wiring and connect through to straight solder pin contacts
- Uses a standard insertion/removal tool
- Light weight

### RUGGED

- Fluid resistant in most aerospace environments
- Available to operate in hydraulic fluid immersion

### EASY TO USE

- Straight solder pin contacts allow modules to be soldered to pc boards or plugged into specialized components
- All contacts are discrete, mainly used to take single leads from a PC board out to wire

Fast, cost-effective termination of pc boards, flat flex cable, and electromechanical components.

### Specifications

#### Dielectric Withstanding Voltage (AS81714 paragraph 3.5.6):

At Sea Level: 1500 VAC<sub>rms</sub>  
At 110,000 Ft: 200 VAC<sub>rms</sub>

**Insulation Resistance** (AS81714 paragraph 3.5.11):  
5000 MΩ min. at 25°C

**Operating Temperature:** -65°C to +200°C

**Physical Shock:** 78 g in each of the 3 mutually perpendicular planes

**Vibration:** Maintains continuity to minimize mechanical or physical damage during or after vibration following vibration levels

#### Level 1—34 minutes per axis

20-90 Hz at 6 dB/oct. rise  
90-300 Hz at 1.0 g<sup>2</sup>/Hz  
300-2000 Hz at 6 dB/oct. fall

#### Level 2—14 minutes per axis

20-40 Hz at 6 dB/oct. rise  
40-350 Hz at 0.5 g<sup>2</sup>/Hz  
350-2000 Hz at 6 dB/oct. fall  
No discontinuities greater than 1 microsecond

**Corrosion:** 48 hours of salt spray

**Magnetic Permeability:** 2.0 μ max.

#### Fluid Resistance:

MIL-PRF-5606: Hydraulic fluid  
MIL-DTL-83133: JP-8 aviation fuel  
MIL-PRF-7808: Lubricating oil

## DEUTSCH CTJ6 and CTJ9 Series Plug and Receptacle Connectors

### SAVE SPACE AND WEIGHT

- Small, lightweight modules
- Flange mounting or in-line mounting for simultaneous connect/disconnect of many wires

### VERSATILE

- Flange or in-line mountable
- Backpack configurations available for receptacle connectors
- Available with optional strain relief
- PCB tail contacts or with crimp backpack

### RELIABLE

- Cork in bottle interfacial seal between the mating halves
- Environmentally resistant

### EASY MATING/UNMATING

- Audible click indicates proper mating
- Simple tool allows unmating

Small, lightweight modules designed for flange mounting or in-line mounting for simultaneous connect/disconnect of many wires.

## CTJ6/CTJ9 Mating Procedure

**Step 1.** With the plug's engaging surface facing the receptacle's mating face and the angled keying surfaces aligned, insert the plug into the receptacle.

**Step 2.** Press the plug and receptacle firmly together until you hear an audible click that indicates the plug is fully seated and locked in position.

## CTJ6/CTJ9 Unmating Procedure

**Step 1.** Place extraction tool CTJ-R06 over the plug module and insert it into the slots on both sides of the receptacle. Push the tool in until the module's locking fingers disengage.

**Step 2.** Pressing the legs of the tool to hold the module tight, pull back to remove the plug module.

## DEUTSCH CTJ7 and CTG Series Grounding Modules and Junctions

### CONVENIENT

- Small rugged devices
- Environmentally sealed
- Simple assembly

### FLEXIBLE

- Stud and flange mounting
- Threaded stud can replace the screw terminals

### RUGGED ONE-PIECE CONSTRUCTION

- Resistant to shock and vibration
- Light weight
- Dissipates heat well

**CTJ7 grounding modules** for multiwire grounding applications that need a small, rugged device that also offers sealing and assembly ease.

**CTG grounding junctions** provide a simple method of terminating a wire to ground. Wires with crimp type contacts inserted into the grounding junctions can then be attached to any grounding surface. Junctions are available for size 22, 20, 16, and 12 contacts.

### Specifications

**Dielectric Withstanding Voltage** (AS81714 paragraph 3.5.6):

- At Sea Level: 1500 VAC<sub>rms</sub>
- At 110,000 Ft: 200 VAC<sub>rms</sub>

**Insulation Resistance** (AS81714 paragraph 3.5.11): 5000 MΩ min. at 25°C

**Operating Temperature:** -65°C to +200°C

**Physical Shock:** 78 g in each of the 3 mutually perpendicular planes

**Thermal Shock** (AS81714 paragraph 3.5.5): After cycling the module between -55°C and +200°C, it will meet all applicable electrical and mechanical requirements

**Vibration:** Maintains continuity to minimize mechanical or physical damage during or after vibration following vibration levels

**Level 1—34 minutes per axis**

- 20-90 Hz at 6 dB/oct. rise
- 90-300 Hz at 1.0 g<sup>2</sup>/Hz
- 300-2000 Hz at 6 dB/oct. fall

**Level 2—14 minutes per axis**

- 20-40 Hz at 6 dB/oct. rise
- 40-350 Hz at 0.5 g<sup>2</sup>/Hz
- 350-2000 Hz at 6 dB/oct. fall

No discontinuities greater than 1 microsecond

**Corrosion:** 48 hours of salt spray

**Magnetic Permeability:** 2.0  $\mu$  max.

**Fluid Resistance:**

MIL-PRF-5606: Hydraulic fluid  
MIL-DTL-83133: JP-8 aviation fuel  
MIL-PRF-7808: Lubricating oil  
MIL-PRF-23699: Lubricating oil

MIL-C-25769: Aircraft cleaning compound  
MIL-PRF-87937: Aircraft cleaning compound  
MIL-G-3056: Gasoline

**Materials**

**Housing:** Composite

**Bus Bar/Pins:** Copper alloy, plated gold

**Pin Contacts:** Gold over copper

**Sealing Grommet:** Elastomer, fluid resistant and environmentally sealed

**Contact Resistance (at 25°C)**

Meets AS39029 paragraph 3.5.4

## DEUTSCH CTL, CTM, and CTN Series In-Line Junctions

### VERSATILE

- Options to connect up to 4 wires in-line and bussed configurations
- Houses and seals individual components
- Replacement for “Y” splices and terminal strips
- Special configurations and designs available

### RUGGED

- Resistant to shock and vibration, per Mil AS39029, paragraph 3.5.9
- Extreme temperature range: -55°C to +200°C
- Resistant to harsh fluids, per Mil AS-81714

### EASY TO USE

- In-line mountable
- Uses AS39029 crimp contacts

**CTL series in-line junctions** connect two wires in-line using crimp-type contacts. The junctions can then be placed in a wire bundle without being mounted.

**CTM series multi-junctions** connect and bus four wires. They can be used to replace “Y” splices and terminal strips.

**CTN Series electronic multi-junctions** are in-line devices that houses and shields passive or active components, including fuses, resistors, diodes, capacitors, or integrated circuits.

#### Dielectric Withstanding Voltage (AS81714):

- At Sea Level: 1500 VAC<sub>rms</sub>
- At 110,000 Ft: 200 VAC<sub>rms</sub>

**Operating Temperature:** -55°C to +200°C

**Physical Shock** (AS39029, paragraph 3.5.9): Items shall not be damaged, there shall be no loosening of parts due to shock, and no interruption of electrical continuity longer than one microsecond during exposure to mechanical shock.

#### Fluid Resistance:

- MIL-PRF-5606: Hydraulic fluid
- MIL-DTL-83133: JP-8 aviation fuel

## DEUTSCH Composite In-line Junctions

### RUGGED

- Rugged composite housing
- Fluid resistant: hydraulic fluid, jet fuel, and other fluids common in aerospace and defense applications
- Environmentally sealed
- No exposed discrete components

### EASY TO USE

- Reliable and quick termination
- No mounting required
- Light weight

### CONVENIENT

- Field serviceable AS39029 socket contacts
- Accommodates a wide range of common gauge wire, from 22 to 12 AWG
- Hand crimp socket contacts

### VERSATILE

- Design options for discrete components available

Designed to AS81714 requirements, DEUTSCH in-line termination junctions are composite versions of the CTL, CTM, and CTN series.

**Dielectric Withstanding Voltage** (AS81714 paragraph 3.5.6):

At Sea Level: 1500 VAC<sub>rms</sub>

At 100,000 Ft: 200 VAC<sub>rms</sub>

**Operating Temperature:** -65°C to +200°C

**Insulation Resistance** (AS81714 paragraph 3.5.11): 5000 MΩ min. at 25°C

**Electrical Continuity:**

## DEUTSCH Adapter Junctions

### CONVENIENT

- Easily convert devices with screw terminals to use DEUTSCH contacts

### FLEXIBLE

- Two thread sizes
- Environmental and nonenvironmental versions

### RELIABLE

- Low-cost contact insertion/removal tool protects converted device by breaking before it can damage junction or device

Adapter junctions provide a quick and easy way to convert electrical components with screw terminals to the CTJ system. The junction attaches to and becomes part of the device to be converted. The adapter junctions are available in two thread sizes (8/32 and 6/32) and in environmental and nonenvironmental versions.

The adapter junctions meet all applicable requirements of MIL-C-26482.

## Outline Dimensions

## DEUTSCH DCR Series Composite Rails

### LIGHT WEIGHT

- 48% lighter than comparable aluminum rails
- Composite version of CTJ3 rail

### VERSATILE

- Intermounts with MIL-T-81714 Series II rails
- Accepts MIL-T-8174M Series II modules
- Simple removal tooling

### HIGH PERFORMANCE

- Wide temperature range: -65°C to +175°C
- Environmentally sealed, fluid resistant
- Corrosion resistant

DEUTSCH DCR composite rails provide a lightweight, corrosion-resistant mounting system for electronic feedback and distribution modules. It is designed to allow hand insertion of each individual module. A positive lock retains the modules in the rails. Modules can be individually unlocked and removed by using a simple tool.

### CTJ Module Removal Tools

The removal tools make it fast and simple to remove modules from a rail or to unmate CTJ6 and CTJ9 plug and receptacle connectors.

#### Part Numbers

**CTJ-R06**  
(Use with CTJ6 and CTJ9 Series)

**CTJ-R12**  
(Use with Rail-Mounted Modules)

## Terminating CTJ AS39029 Contacts

Make sure you have the proper tool and positioner for the contact being crimped.

| Contact Size | Crimp Tool          |                     |
|--------------|---------------------|---------------------|
|              | Tooling             | Positioner          |
| 22           | MH860 (M22520/7-01) | 86-19 (M22520/7-11) |
| 20           | MH860 (M22520/7-01) | 86-20 (M22520/7-12) |
| 16           | MH860 (M22520/7-01) | 86-21 (M22520/7-13) |
| 22           | AF8 (M22520/1-01)   | M22520/1-16         |

Strip the wire to the proper dimension using an appropriate tool and method.

| Contact Size | Strip Length              |
|--------------|---------------------------|
| 22, 20, 16   | 0.207 60.030 (5.26 60.76) |
| 12           | 0.225 60.030 (5.72 60.76) |

Insert the contact into the tool with the crimp barrel facing up.

Insert the stripped conductor into the contact's crimp barrel.

Cycle the crimping tool by squeezing the handles. The handles will not release until the tool has fully cycled.

Remove the wire and inspect the termination.

A proper termination has:

- 8 indent markings
- Wire observable through the contact side hold
- No loose or nicked wire strands

## Inserting and Removing Contacts

The colored end is used for insertion. The white or orange end is used for withdrawal.

| Contact Size | Tool Part No. | Color        |
|--------------|---------------|--------------|
| 22           | M81969/14-01  | Green/White  |
| 20           | M81969/14-10  | Red/Orange   |
| 16           | M81969/14-03  | Blue/White   |
| 12           | M81969/16-03  | Yellow/White |

### Inserting Contacts

Insert the wire into the tool's slot.  
Pull back gently on the wire until the contact's retention shoulder seats against the tip of the tool.

Insert the contact in the proper module cavity.  
Push the contact completely in.  
Then remove the tool.  
Lightly pull the wire back to make sure the contact is correctly seated.

### Removing Contacts

Wrap the tool's slot around the wire.  
Slide the tool into the cavity until it butts against the contact shoulder.

Press the wire between your fingers and the tool. Pull the wire and tool back together.

**Note:** When using minimum diameter wire, the tool may have a tendency to stop against the rear of the contact crimp barrel. If this should occur, careful manipulation of the tool will permit it to ride over the crimp barrel and into the proper position to unlock the contact.

### Installing Sealing Plugs

Sealing plugs are installed with the head towards the mating end of connector. Use the contact insertion tool if needed.
