

Surface Mount Wideband RF Transformers

These wideband RF transformers provide excellent performance at a very economical price. They come tapped or untapped and are packaged in a low profile, flat top ceramic case that makes them ideal for pick and place operations. They feature 400 V isolation and 1/4 Watt RF power rating. Operating temperature range is -40° to +85°C.

Applications include impedance matching, voltage or current transformation, DC isolation, balanced/unbalanced mixing, matching, power splitting, coupling and signal inversion.

In addition to the standard parts shown, transformers with other combinations of impedance ratio, insertion loss, frequency response and current handling are available.

Coilcraft **Designer's Kit C129** contains samples of each part. Order by phone or at <http://order.coilcraft.com>.

Type	Part number	Impedance ratio Pri:Sec	Bandwidth (MHz)	Idc (mA)	Insertion loss max (dB)	Pins 1-3		Pins 6-4		Color code
