

Bundling Clips for Weld Studs

Features and Benefits

BundlingClips with a variety of types of clip have been designed for winding cables and cable looms. The cables to be wound are easily fixed to the winder bar with cable ties or adhesive tape.

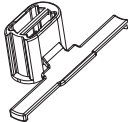

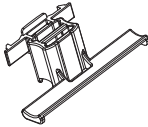

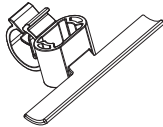

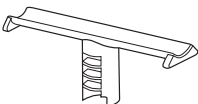

This is followed by simple mounting on a weld stud. Unlike a round clip, the weld clip benefits from the length tolerance compensation of up to 4 mm.

Other applications include the connection of ConnectorClips or OmegaClips, both of which support the subsequent addition and parallel running of individual cables post-installation.

TCSB5CYCC: Tapebar, Stud Retainer and ConnectorClip in just one article.

Technical Table

Article-No.	Type	Length (L)	Stud Ø	Colour	Material	Drawing
Bundling Clips for Weld Studs, movable,						
151-26101	TC-SB5C	55.0	5.0	Black (BK)	PA66HS	
Bundling Clips for Weld Studs, movable, for Connectors						
151-00484	TCSB5CYCC	55.0	5.0	Black (BK)	PA66HIRHS	
Bundling Clips for Weld Studs, movable, with Harness Clip						
155-23701	WICKELCLIP-SB5	60.0	5.0	Black (BK)	POM	
Bundling Clips for Weld Studs						
151-00664	BCO55	59.0	5.0	Black (BK)	PA66HIRHS	
151-00281	BCO56	59.0	6.0	Black (BK)	PA66HIRHS
